Synthesize - Page 439: 5
Answer The old
interpretation of horse
evolution is wrong since
we now have more fossil
data showing that many
lines of horses evolved,
most of which are now
extinct.

Section 16.6: * Identify
specific evidence that
supports evolutionary theory
and that of a common
ancestor and how this
evidence was obtained and
analyzed i.e. what

conclusions are drawn from it.

* Explain how genetics is used
to understand evolution.

Section 16.7: * Identify
true/false statements about
evolution.

...

Another evidence of evolution is the convergence of form in organisms that share similar environments. For example, species of unrelated animals,

such as the arctic fox and ptarmigan (a bird), living in the arctic region have temporary white coverings during winter to blend with the snow and ice (Figure 11.12). The similarity occurs not because of common ancestry, indeed one covering is of fur ...

Chapter 16 Evidence of Evolution Section 16.1

Reflections of a Distant Past
Asteroids are small planets hurtling through space. They range in size from 1 to 1,500 kilometers (roughly 0.5 to 1,000 miles) across. Barringer Crater in Arizona, an asteroid 45 meters (150 feet) wide made this impressive pockmark in the desert sandstone when it slammed into Earth 50,000 years ago with an impact 150 ...

11.3 Evidence of Evolution - Concepts of Biology | OpenStax

Chapter 16 Evolution of Populations 16–1 Genes and Variation Darwin’s original ideas can now be under-stood in genetic terms. Beginning with variation, we now know that traits are con-trolled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozy-gous for many genes.
