biochemistry is considered the best evidence for evolution. An important protein in animals called cytochrome c is used during cellular respiration. There are fewer differences in the amino acid sequence of this protein between more closely related species.  
Evidence of Evolution2008  
The fact that evolution is based on its own set of unprovable, untestable, and unfalsifiable assumptions is often unrecognized in the scientific community. Within the scientific literature, the mathematical and chemical impossibilities of the origin of the universe and life on earth are recognized.  
Key Concept Builder Fossil Evidence Of Evolution Answer ...  
In some cases, the evidence for evolution is that we can see it taking place around us! Important modern-day examples of evolution include the emergence of drug-resistant bacteria and pesticide-resistant insects. For example, in the 1950s, there was a worldwide effort to eradicate malaria by eliminating its carriers (certain types of mosquitos).
