An award-winning scientist offers his unorthodox approach to  
childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full  
of wisdom...bound to change your thinking about parenting and its  
conventions ” (Amy Chua, author of Battle Hymn of the Tiger  
Mother). If you ' re like many parents, you might ask family and  
friends for advice when faced with important choices about how to  
raise your kids. You might turn to parenting books or simply rely on  
timeworn religious or cultural traditions. But when Dalton Conley, a  
dual-doctorate scientist and full-blown nerd, needed childrearing  
advice, he turned to scientific research to make the big decisions. In  
Parentology, Conley hilariously reports the results of those  
experiments, from bribing his kids to do math (since studies show  
conditional cash transfers improved educational and health outcomes  
for kids) to teaching them impulse control by giving them weird names  
(because evidence shows kids with unique names learn not to react  
when their peers tease them) to getting a vasectomy (because fewer kids  
in a family mean smarter kids). Conley encourages parents to draw on  
the latest data to rear children, if only because that level of engagement  
with kids will produce solid and happy ones. Ultimately these  
experiments are very loving, and the outcomes are redemptive—even  
when Conley ' s sassy kids show him the limits of his profession.  
Parentology teaches you everything you need to know about the latest  
literature on parenting—with lessons that go down easy. You ' ll be  
laughing and learning at the same time.
