This beautiful book reveals works from the  
Victoria and Albert Museum's rich collection of  
drawings ranging from the early 17th century  
right up to the present day. Reproducing, often  
for the first time, works by foremost British artists,  
this book offers fresh insights into the wide range  
of ways in which these artists have used drawing  
to think on paper, build up ideas, and make

finished exhibition pieces. Including examples  
from the greatest masters—William Blake,  
Thomas Rowlandson, John Constable, Dante  
Gabriel Rossetti, Edward Burne-Jones, Paul Nash,  
Lucian Freud, David Hockney, John Piper,  
Grayson Perry, and others—author Susan Owens  
discusses the art and craft of drawing, materials,  
and techniques, and why artists chose them.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
