How can I become an

effective teacher in college or university? What teaching tools and techniques are available to me and what is the best way to use them? How do I tackle common difficulties associated with college and university teaching? This book is designed for teachers in further and higher education, particularly those who do not have specialist backgrounds in education, pedagogy or academic practice. It presents useful theory and literature from the fields of organizational behaviour, learning, pedagogy and education, to enhance the practical advice the book contains. A range of evidence-based insights are examined in order to help support the delivery of academic expertise both within and beyond classroom settings. The book also encourages teachers to adopt a reflective orientation and to try out different classroom, interactive or discursive activities and tactics that have been successfully used in similar settings. In addition, this book helps teachers from across the disciplines not only to develop effective skills in conventional classroom settings (lecture halls, tutorial rooms, one-to-one student consultations) but to consider new approaches to online, blended, and distance learning. Teaching at College and University provides the most practical evidence-based resource for those involved in teaching at universities and colleges, as well as researchers and policy makers with an interest in good practice in

academic settings.

The author, Cliff Ashton, was born just after World War II in Springburn, Glasgow, and this book includes many humorous accounts of his school days, his apprenticeship with British Rail, his university years, and finally, the initial part of his

career in the oil industry. Joining Shell in its Exploration and Production arm in 1971, he was posted to The Netherlands, The Sultanate of Oman - where he meets his future wife - and back to the Netherlands. While the author covers some technical aspects in the book, it is written mainly as an entertaining account of a life "in oil" and to inform the general reader about the challenges faced by the oil

companies, and, perhaps more importantly, by the individuals who work in the industry.

Life under communism is cruel

and inhumane. Commit the smallest political infraction, and the secret police will arrest you. The only ray of hope is the West, but getting out from communism is difficult.

Communist countries have a “Berlin Wall” around them. It is a crime to escape by crossing the border illegally, and anyone caught is beaten and imprisoned, sometimes even shot. I was eighteen, and I was living in hell. However, I would rather have died than keep living as a communist slave. This is my story of what happened and how I reached freedom.
