HarperCollins
This book
chronicles the
author's
application of
critical pedagogy
in Hong Kong
secondary

students from

working-class
families of South
Asian heritage, so-
called 'ethnic
minorities' in the
local context. Soto
used concepts
such as banking
pedagogy,
generative
themes, liberatory

dialogue, and transformative resistance, to first understand students' school, online, and community experiences, and then to reshape his teaching of English and humanities subjects to address the students' academic, social, and emotional needs. This critical ethnography is set against educational reforms in Hong Kong, which re-orientated schools towards developing a knowledge-economy workforce, increased privatization and

competition in the school system, aimed to build national identification with China, and sought to address growing inequality in a territory known for wealth disparity. While these reforms opened opportunities for implementing student-centered pedagogies in schools and increased student access to tertiary education, ethnic minority youth faced ongoing economic and social marginalization on top of academic difficulties. The central narrative captures everyday

struggles and contradictions arising from intersections of neoliberal reforms, institutional school histories, students' transnational realities, and collective efforts for equity and social justice. In the course of the book a parallel story unfolds, as the author explores what it means to be a critical teacher and researcher, and is reborn in the process. The book's 'on the ground' story is hopeful, yet tempered, in discussing the limits and possibilities for

critical pedagogy. It will be of a great resource for researchers, teacher educators, and pre-service and in-service teachers who are interested in the topic.

This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a

language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In

turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic

Interestingly, Fingerroth also expands the definition of superhero so that it would include characters like John McClane of the Die Hard movies: "Once they dodge ridiculous quantities of machine gun bullets they're superheroes, cape or no cape." From summer blockbusters to best-selling graphic

novels, the superhero is an integral part of our culture. What is a Superhero? not only illuminates this pop-culture figure, but also sheds much light on the fantasies and beliefs of the American people. *IELTS practice tests* Jing Kung Educational Press Help your students catch up, keep up and make expected progress in their GCSE
