This review, developed in cooperation with UNICEF, provides Serbia with recommendations to help strengthen its evaluation and assessment system to focus on support for student learning. It will be of interest to Serbia, as well as other countries looking to make more effective use of their evaluation and assessment system to improve quality and equity, and result in better outcomes for all students.

Cracking the AP Human Geography Exam, 2015 Edition Disha Publications

This book de-myths the oft repeated claim of 'natural disaster' and puts forward socio-economic factors as the cause for the recurrence of disasters. With this framework, the author examines the popular notion of the Vulnerable India in psycho-geographical terms and unmasks the dimensions of vulnerability itself. In doing so the author foregrounds the factors that create and perpetuate vulnerability of the marginalized sections of the society and of the nation and redefines the phrase Vulnerable India. Presenting a national level inquiry, the three sections of the book called the Fact, Response, and Reality, spell a convincing argument for why disasters recur in India. To provide a historical understanding of India 's continued failure to adequately contain damage to life and property, the book unravels the perceptions of disasters in traditional, colonial and modern India. It redefines the debate on new terms such as 'disasterscape', 'the killed', 'disaster index', 'disaster divide' and 'vulnerability cluster', to better represent the patterns that engender vulnerability. With the aid of exhaustive research, comparative statistical analyses and illustrative maps, it provides incisive insight into 16 different geophysicals across 594 districts of the country. This book is ideal for students of geography, environmental sociology, development studies, social work and disaster management, and also for policy makers.

Curriculum Innovations in Changing Societies Disha Publications

In the West, a specific ideal for female genitalia has emerged: one of absence, a "clean slit," attained through the removal of pubic hair and, increasingly, through female genital cosmetic surgery known as FGCS. In *The Perfect Vagina: Cosmetic Surgery in the Twenty-First Century*, Lindy McDougall provides an ethnographic account of women who choose FGCS in Australia and the physicians who perform these procedures, both in Australia and globally, while also examining the environment in which surgeons and women come together.

Physicians have a vested interest in establishing this surgery as valid medical intervention, despite majority medical opinion explicitly acknowledging that a wide range of genital variation is normal. McDougall offers a nuanced picture of why and how these procedures are performed and draws parallels between FGCS and anthropological discussions of female genital circumcision (cutting). Using the neologism biomagical, she argues that cosmetic surgery functions as both ritual and sacrifice due to its promise of transformation while simultaneously submitting the body to the risks and pain of surgery, thus exposing biomedicine as an increasingly cultural and commercial pursuit. *The Perfect Vagina* highlights the complexities involved with FGCS, its role in Western beauty culture, and the creation and control of body image in countries where self-care is valorized and medicine is increasingly harnessed for enhancement as well as health.

Regents Exams and Answers: Global History and Geography 2020

Rapid—and seemingly accelerating—changes in the economies of developed nations are having a proportional effect on the skill sets required of workers in many new jobs. Work environments are often technology-heavy, while problems are frequently ill-defined and tackled by multidisciplinary teams. This book contains insights based on research conducted as part of a major international project supported by Cisco, Intel and Microsoft. It faces these new working environments head-on, delineating new ways of thinking about '21st-century' skills and including operational definitions of those skills. The authors focus too on fresh approaches to educational assessment, and present methodological and technological solutions to the barriers that hinder ICT-based assessments of these skills, whether in large-scale surveys or classrooms. Equally committed to defining its terms and providing practical solutions, and including international perspectives and comparative evaluations of assessment methodology and policy, this volume tackles an issue at the top of most educationalists' agendas.
