The book explores aspects of reflexivity and interactivity in a variety of academic genres: oral and written, scientific and educational. Academic discourse is explored from a variety of perspectives that take a dialogic view of language use as their starting point, ranging from conversation analysis to descriptive or

applied genre studies. Particular attention is paid to the way metadiscursive expressions contribute to a representation of the communicative procedures that characterise the ongoing (scientific and educational) dialogues.

Understanding and Evaluating Research: A Critical Guide shows students how to be

critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report. [The Rhetoric of the Abstract in English and Spanish Scientific Discourse](#) Yale University Press

Scientific English: Conceptual Understanding and Abstract Writing è un compendio di Inglese Scientifico scritto in lingua inglese, uno strumento per meglio scrivere e comprendere il linguaggio accademico in lingua. Il testo identifica nei connettivi enunciativi i perni del discorso scientifico, offre una serie di spunti per aumentare la propria velocità di lettura e mostra come scrivere un abstract che risulti corretto da un punto di vista accademico e accattivante da un punto di vista bibliometrico. Il compendio analizza la tipologia degli articoli scientifici e la loro articolazione in sezioni, facendo esplicito riferimento al formato IMRAD; nel contempo, provvede una griglia per la coniugazione dei verbi proprio in funzione di tali sezioni, fornisce uno schema per l'uso e l'identificazione dei connettivi enunciativi, esamina i tipi di paragrafo utilizzati in ambito scientifico, offre una tabella per il corretto posizionamento degli avverbi e una lista di frasi fatte utili nella composizione dei resoconti scientifici. Scientific English: Conceptual Understanding and Abstract Writing is a compendium of Scientific English written in English, and a tool to better understand academic language both spoken and written. The text identifies sentence connectors as the pillars underpinning scientific discourse, offers a number of ideas to increase one's reading speed and shows how to write effective abstracts that are both appropriate from an academic perspective, and conducive to a high bibliometric score. This compendium analyses the typologies of scientific

articles and their articulation into sections, making specific reference to the IMRAD format, whilst providing a framework for the conjugation of verbs according to these sections and offering a scheme for the use, as well as identification of sentence connectors. Furthermore, it also examines the various paragraph types used within science, offering a table to assist in the correct positioning of adverbs and providing a list of common phrases and idioms useful in the composition of scientific reports.

## [Writing Scientific Research in Communication Sciences and Disorder](#) Elsevier

This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, "must-know" content on how to write high-quality articles. The book also addresses other, rarely discussed areas of scientific writing including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive

Most scientists live in a "publish or perish" environment, but few would describe themselves as brilliant (or enthusiastic) writers. Coming to the aid of all those wishing to improve the quality of their scientific writing -- established researchers and aspiring students alike -- three experienced authors/scientists from differing backgrounds and cultures have compiled this classic guide. This new edition has been completely revised to reflect dramatic changes in communication over the past 15 years. The primary emphasis is on writing techniques, accurate expression, adherence to accepted standards, and above all clarity, but the authors also venture into communication technology and organizational as well as ethical aspects of science. Numerous appendices and a particularly comprehensive index complete this highly useful book. "The authors have a passion, not only for clarity and economy of style, but also for precision and consistency." (Nature) "A wealth of information contained in a single book of manageable proportions. Students reporting on a simple laboratory experiment and their teachers preparing a paper or lecture will both find this book a constant companion." (European Science Editing) "The book under review claims, 'we know of no book as broad in its coverage, as critical in its analysis of existing trends, and as international in

its scope'. This claim is immodest but accurate." (Trends in Pharmacological Sciences)

Despite their changing role, abstracts remain useful in the digital world. Highly beneficial to information professionals and researchers who work and publish in different fields, this book summarizes the most important and up-to-date theory of abstracting, as well as giving advice and examples for the practice of writing different kinds of abstracts. The book discusses the length, the functions and basic structure of abstracts, outlining a new approach to informative and indicative abstracts. The abstractors' personality, their linguistic and non-linguistic knowledge and skills are also discussed with special attention. Despite the relatively large number of textbooks on the topic there is no up-to-date book on abstracting in the English language In addition to providing a comprehensive coverage of the topic, the proposed book contains novel views - especially on informative and indicative abstracts The discussion is based on an interdisciplinary approach, blending

the methods of library and information science and linguistics

Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on-line at an incredible rate. One result is the oft-decried information overload. No one has time to

read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches, Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem Areas.
