Some people think that a cookbook is just a collection of recipes for dishes that feed the body. In *Eat My Words: Reading Women's Lives through the Cookbooks They Wrote*, Janet Theophano shows that cookbooks provide food for the mind and the soul as well. Looking beyond the ingredients and instructions, she shows how women have used cookbooks to assert their individuality, develop their minds, and structure their lives. Beginning in the seventeenth century and moving up through the present day, Theophano reads between the lines of recipes for dandelion wine, "Queen of Puddings," and half-pound cake to capture the stories and voices of these remarkable women. The selection of books looked at is enticing and wide-ranging. Theophano begins with seventeenth-century English estate housekeeping books that served as both cookbooks and reading primers so that women could educate themselves during long hours in the kitchen. She looks at *A Date with a Dish*, a classic African American cookbook that reveals the roots of many traditional American dishes, and she brings to life a 1950s cookbook written specifically for Americans by a Chinese émigré and transcribed into English by her daughter. Finally, Theophano looks at the contemporary cookbooks of Lynne Rosetto Kasper, Madeleine Kamman, and Alice Waters to illustrate the sophistication and political activism present in modern cookbook writing. Janet Theophano harvests the rich history of cookbook writing to show how much more can be learned from a recipe than how to make a casserole, roast a chicken, or bake a cake. We discover that women's writings about food reveal--and revel in--the details of their lives, families, and the cultures they help to shape.

Algorithms of Oppression Harper Collins  
In his most extraordinary book, the bestselling author of *Awakenings* and "poet laureate of medicine " (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks ' s *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks ' s splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine ' s ultimate responsibility: " the suffering, afflicted, fighting human subject. "

A new career in academia can be a challenge. While academia's formal rules are published in faculty handbooks, its implicit rules are often difficult to discern. Like its first edition, this expanded volume contains practical advice to help new academics set the best course for a lasting and vibrant career. problems beginning social scientists will face. Leading academics share the lessons they have learned through their own hard experience. Individual chapters present the ins and outs of the hiring process; the advantages of a post-doctoral fellowship; expert strategies for managing a teaching load; insider and applicant advice for winning a research grant; detailed instructions for writing and publishing a journal article; and an explanation of

intellectual property issues. The text also addresses the latter stages of a career. It offers suggestions for keeping one's career dynamic. Chapters that provide specific information for minorities, women and clinical psychologists are also included, and the volume even presents options for working outside of academia.

Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.

Communication in Autism adopts a

multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with autism have age-appropriate language, a number have exceptional language skills; others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism, and students learning about communication and autism (e.g., in psychology, speech pathology, and education).

The revolutionary literary vision that sowed the seeds of Objectivism, Ayn Rand's groundbreaking philosophy, and brought her immediate worldwide acclaim. This modern classic is the story of intransigent young architect Howard Roark, whose integrity was as unyielding as granite...of Dominique Francon, the exquisitely beautiful woman who loved Roark passionately, but married his worst enemy...and of the fanatic denunciation unleashed by an enraged society against a great creator. As fresh today as it was then, Rand's provocative novel presents one of the most challenging ideas in all of fiction—that man's ego is the fountainhead of human progress... "A writer of great power. She has a subtle and ingenious mind and the capacity of writing brilliantly, beautifully, bitterly...This is the only novel of ideas written by an American woman that I can recall."—The New York Times

The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20–23) organised by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International Conference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

Saving lives through organ transplantation has become increasingly possible thanks to advances in research and care. Today, the complex field of transplantation continues to develop rapidly, fuelled by demographic change and further evolutions in scientific understanding. The Oxford Textbook of Transplant Anaesthesia and Critical Care has been written and edited by pioneers in the field of organ transplantation with an international team of authors, in order to equip anaesthetists and intensivists with the knowledge and training necessary to provide high quality and evidence-based care. The text addresses fundamentals aspects of scientific knowledge, care of the donor patient, transplant ethics and special considerations. Dedicated sections address each of the major organs; kidney, pancreas, liver, heart and lung, intestinal and multivisceral. Within each organ-based section, expert authors explore underlying disease, planning for transplantation, specialized procedures, perioperative and critical care management as well as post-transplant considerations. Focus points for future developments in transplant immunology are also set out, inspiring current practitioners to engage with current clinical research and help participate in the further advancement of the science of transplantation. The print edition of the Oxford Textbook of Transplant Anaesthesia and Critical Care comes with a year's access to the online version on Oxford Medicine Online. A young man's quest to reconcile his deafness in an unforgiving world leads to a

remarkable sojourn in a remote African village that pulsates with beauty and violence These are hearing aids. They take the sounds of the world and amplify them." Josh Swiller recited this speech to himself on the day he arrived in Mununga, a dusty village on the shores of Lake Mweru. Deaf since a young age, Swiller spent his formative years in frustrated limbo on the sidelines of the hearing world, encouraged by his family to use lipreading and the strident approximations of hearing aids to blend in. It didn't work. So he decided to ditch the well-trodden path after college, setting out to find a place so far removed that his deafness would become irrelevant. That place turned out to be Zambia, where Swiller worked as a Peace Corps volunteer for two years. There he would encounter a world where violence, disease, and poverty were the mundane facts of life. But despite the culture shock, Swiller finally commanded attention—everyone always listened carefully to the white man, even if they didn't always follow his instruction. Spending his days working in the health clinic with Augustine Jere, a chubby, world-weary chess aficionado and a steadfast friend, Swiller had finally found, he believed, a place where his deafness didn't interfere, a place he could call home. Until, that is, a nightmarish incident blasted away his newfound convictions. At once a poignant account of friendship through adversity, a hilarious comedy of errors, and a gripping narrative of escalating violence, The Unheard is an unforgettable story from a noteworthy new talent.
