Another example of crystallizing salt out of a supersaturated solution can be seen in the following video. In this case, a supersaturated solution of

sodium acetate is poured over a crystal of sodium acetate. These crystals provide the lattice structure "seed" which causes the sodium acetate ions in solution to crystallize out.

Example Of Supersaturated Solution

A supersaturated solution is one that has more solute than it can hold at a certain temperature. Typically when the temperature of a solution is increased, more particles can be dissolved, thus increasing the amount of solute. A supersaturated solution goes through all of the steps listed above for the iced tea.
