For more than fifteen years, the manuscript editing department of the Press has overseen online publication of the monthly "Chicago Manual of Style" Q&A, choosing interesting questions from a steady stream of publishing-related queries from "Manual" users and providing thoughtful and/or humorous answers in a smart, direct, and occasionally cheeky voice. More than 28,000 followers have signed up to receive e-mail notification when new Q&A content is posted monthly, and the site receives well over half a million visitors annually. "But Can I Start a Sentence with But ? "culls from the extensive Q&A archive a small collection of the most helpful and humorous of the postings and provides a brief foreword and chapter introductions. The material is organized into seven chapters that cover matters of editorial style, capitalization, punctuation, grammar and usage, citation and quotation, formatting and other non-language issues, and a final chapter of miscellaneous items. Together they offer an informative and amusing read for editors, other publishing professionals, and language lovers of all stripes."

In *Rigging the Game* Michael Schwalbe offers a clear and compelling introduction to how the rules that shape economic life and everyday interaction generate and perpetuate inequality in American society. Guided by the questions How did the situation get this way? and How does it stay this way?, Schwalbe tracks inequality from its roots to its regulation. With its lively combination of analysis and stories, *Rigging the Game* is an innovative tool for teaching about the inequalities of race, class, and gender. In the final chapter, "Escaping the Inequality Trap," Schwalbe helps students understand how inequality can be challenged and overcome.

Post-Keynesian Economic Theory explores and develops several areas of post- Keynesian economics most in need of additional fundamental research, including: a monetary theory of production; post-Keynesian price theory; international economics; labor economics; financing aggregate demands; and the liquidity preference theory of interest. The book presents a constructive post-Keynesian critique of contemporary macroeconomic conceptualization and practice. It illustrates the illusory character of the search for unique, determinate results in the problems of macroeconomics and clearly demonstrates the complexity and resulting richness of meaningful economic theory.

Stasiland tells true stories of people who heroically resisted the communist dictatorship of East Germany, and of people who worked for its secret police, the Stasi. Internationally hailed as a classic, it is 'fascinating, entertaining, hilarious, horrifying and very important' (Tom Hanks) and 'a heartbreaking, beautifully written book.' (Claire Tomalin). East Germany was one of the

most intrusive surveillance states of all time. One in 7 people spied on their friends, family and colleagues. In ‘the most humane and sensitive way’ (J.M. Coetzee) Funder tells the true stories of four people who had the extraordinary courage to refuse to collaborate with the Stasi, and the price they paid. She meets Miriam Weber, who was imprisoned at 16 after scaling the Berlin Wall. She drinks with the legendary “Mik Jegger” of the Eastern Bloc who was ‘disappeared’. And she finds former Stasi men who defend their regime long past its demise, and yearn for the second coming of Communism. Stasiland won the Samuel Johnson Prize for best non-fiction published in English in 2004. It was a finalist for the Guardian First Book Award, the W.H. Heinemann Award, the Index Freedom of Expression Awards, The Age Book of the Year Awards, the Queensland Premier’s Literary Award and the Adelaide Festival Awards for Literature (Innovation in Writing). It is read in schools and universities in many countries, and has been adapted for CD and the stage by The National Theatre, London.

Proceedings of the 6th International Conference on Economic Management and Green Development Odyssey Editions Margaret Carr’s seminal work on Learning Stories was first published by SAGE in 2001, and this widely acclaimed approach to assessment has since gained a huge international following. In this new full-colour book, the authors outline the philosophy behind Learning Stories and refer to the latest findings from the research projects they have led with teachers on learning dispositions and learning power, to argue that Learning Stories can construct learner identities in early childhood settings and schools. By making the connection between sociocultural approaches to pedagogy and assessment, and narrative inquiry, this book contextualizes Learning Stories as a philosophical approach to education, learning and pedagogy. Chapters explore how Learning Stories: - help make connections with families - support the inclusion of children and family voices - tell us stories about babies - allow children to dictate their own stories - can be used to revisit children’s learning journeys - can contribute to teaching and learning wisdom This ground-breaking book expands on the concept of Learning Stories and includes examples from practice in both New Zealand and the UK. It outlines the philosophy behind this pedagogical tool for documenting how learning identities are constructed and shows, through research evidence, why the early years is such a critical time in the formation of learning dispositions. Margaret Carr is a Professor of Education at the University of Waikato, New Zealand. Wendy Lee is Director of the Educational Leadership Project, New Zealand.

Intended for students of intermediate organic chemistry, this text shows how to write a reasonable mechanism for an organic chemical transformation. The discussion is organized by types of mechanisms and the conditions under which the reaction is executed, rather than by the overall reaction as is the case in most textbooks. Each chapter discusses common mechanistic pathways and suggests practical tips for drawing them. Worked problems are included in the discussion of each mechanism, and "common error alerts" are scattered throughout the text to warn readers about pitfalls and misconceptions that bedevil students. Each chapter is capped by a large problem set.

This comprehensive volume provides the knowledge and skills that mental health professionals need for more effective, informed work with clients with disabilities. Combining her extensive knowledge as a clinician, researcher, and teacher with her personal experience as someone with a disability, Olkin provides an insider’s perspective on critical issues that are often overlooked in training. A lucid conceptual framework is presented for understanding disability as a minority experience, one that is structured by social, legal, and attitudinal constraints as well as physical challenges. Illuminating frequently encountered psychosocial themes and concerns, chapters describe a range of approaches to dealing with disability issues in the treatment of adults, children, and families. Topics addressed include etiquette with clients with disabilities; special concerns in assessment, evaluation, and diagnosis; the impact of disability on sexuality and romance, as well as pregnancy, birthing, and parenting; the use of assistive technology and devices; disability and substance abuse; and more. Filled with clinical examples and observations, the volume also discusses strategies for enhancing teaching, training, and research.
