Post-

Keynesian Economic Theory explores and develops several areas of post-Keynesian economics most in need of additional fundamental research, including: a monetary theory of production; post-Keynesian price theory; international economics; labor economics; financing aggregate demands; and the liquidity preference theory of interest. The book presents

a constructive post-Keynesian critique of contemporary macroeconomic conceptualization and practice. It illustrates the illusory character of the search for unique, determinate results in the problems of macroeconomics and clearly demonstrates the complexity and resulting richness of meaningful economic theory.

In the current volume, the selected studies have been grouped into three thematic sections, presenting readers with a set of distinct but related research on meaningful issues for a modern learning experience. The first three chapters present professional and teacher development perspectives and collectively shed light on how to develop, maintain, and improve pre and in-service teacher training and professional

development. The second set of four chapters provide research findings that describe the results of direct applications of modern learning elements through course assignments and teaching approaches. The final five chapters focus on critical thinking and range in their focus from classroom-based studies to full-scale curriculum reform. The collection of chapters presented in this volume represents the eclectic nature of modern learning experiences and demonstrate its

applicability across educational contexts and disciplines. The chapters resonate with other educational researchers in search of novel ways of creating, facilitating, and investigating modern learning experiences. PHREEQC version 3 is a computer program written in the C and C++ programming languages that is designed to perform a wide variety of aqueous geochemical calculations. PHREEQC implements several types of aqueous models: two ion-association aqueous models (the Lawrence Livermore National Laboratory model

and WATEQ4F), a transfers of Pitzer specific-ion- interaction aqueous model, and the SIT (Specific ion Interaction Theory) aqueous model. Using any of these aqueous models, PHREEQC has capabilities for (1) speciation and saturation-index calculations; (2) batch-reaction and one-dimensional (1D) transport calculations with reversible and irreversible reactions, which include aqueous, mineral, gas, solid-solution, surface-complexation, and ion-exchange equilibria, and specified mole reactants, kinetically controlled reactions, mixing of solutions, and pressure and temperature changes; and (3) inverse modeling, which finds sets of mineral and gas mole transfers that account for differences in composition between waters within specified compositional uncertainty limits. To Kill a Mockingbird Oxford University Press, USA An account of the link between Locke's thought and the American Founding. The author argues that previous writers

have misread Locke's influence on the Founders: he portrays the philosopher as a moderate 17th-century moralist advocating an individualism that fits well with classic republicanism. The Bare Bones Camera Course for Film and Video CSMFL Publications "This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant." —Allyson S. Maida, St. John's University Introduction to Criminology, Tenth Edition, is a comprehensive introduction to the study of criminology, focusing on the

vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, Hagan and Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. A Complete Teaching & Learning Package The Zones of Regulation W. Norton &

Company
"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a

different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others'

facial expressions one or more and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Niccolo Machiavelli's The Prince John Wiley & Sons
In the years

following World War II, American writers and artists produced a steady stream of popular stories about Americans living, working, and traveling in Asia and the Pacific. Meanwhile the U.S., competing with the Soviet Union for global power, extended its reach into Asia to an unprecedented degree. This book reveals that these trends—the proliferation of Orientalist culture and the expansion of U.S. power—were linked in complex and surprising ways. While most cultural historians

of the Cold War have focused on the culture of containment, Christina Klein reads the postwar period as one of international economic and political integration—a distinct chapter in the process of U.S.-led globalization. Through her analysis of a wide range of texts and cultural phenomena—including Rodgers and Hammerstein's *South Pacific* and *The King and I*, James Michener's travel essays and novel *Hawaii*, and Eisenhower's *People-to-People Program*—Klein

shows how U.S. policy makers, together with middlebrow artists, writers, and intellectuals, created a culture of global integration that represented the growth of U.S. power in Asia as the forging of emotionally satisfying bonds between Americans and Asians. Her book enlarges Edward Said's notion of *Orientalism* in order to bring to light a cultural narrative about both domestic and international integration that still resonates today. College Research Papers For

Dummies SAGE Publications Discipline-Specific Writing provides an introduction and guide to the teaching of this topic for students and trainee teachers. This book highlights the importance of discipline-specific writing as a critical area of competence for students, and covers both the theory and practice of teaching this crucial topic. With chapters from practitioners and researchers working across a wide range of contexts around the world, *Discipline-Specific Writing: Explores teaching strategies in a variety of specific areas including*

science and technology, social science and business; Discusses curriculum development, course design and assessment, providing a framework for the reader; Analyses the teaching of language features including grammar and vocabulary for academic writing; Demonstrates the use of genre analysis, annotated bibliographies and corpora as tools for teaching; Provides practical suggestions for use in the classroom, questions for discussion and additional activities with each chapter. Discipline-Specific Writing is key reading for students

taking courses in English for Specific Purposes, Applied Linguistics, TESOL, TEFL and CELTA. *American Hookup: The New Culture of Sex on Campus* Penguin In The Future of the Internet: And How to Stop It Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is

dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we

could lose everything.

The Great Mental Models, Volume 1

Oxford University Press
Discover the essential thinking tools you've been missing with *The Great Mental Models* series by Shane Parrish, New York Times bestselling author and the mind behind the acclaimed Farnam Street blog and "The Knowledge Project" podcast. This first book in the series is your guide to learning the crucial thinking tools nobody ever taught you. Time and time again, great thinkers such as Charlie Munger and Warren Buffett have credited their success to mental models—representations of how something works that can scale onto

other fields. Mastering a small number of mental models enables you to rapidly grasp new information, identify patterns others miss, and avoid the common mistakes that hold people back. The Great Mental Models: Volume 1, General Thinking Concepts shows you how making a few tiny changes in the way you think can deliver big results. Drawing on examples from history, business, art, and science, this book details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making and productivity. This book will teach

you how to: Avoid blind spots when looking at problems. Find non-obvious solutions. Anticipate and achieve desired outcomes. Play to your strengths, avoid your weaknesses, ... and more. The Great Mental Models series demystifies once elusive concepts and illuminates rich knowledge that traditional education overlooks. This series is the most comprehensive and accessible guide on using mental models to better understand our world, solve problems, and gain an advantage. Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and

violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and

savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.
