Quick Hits for Service-Learning Cambridge University Press Hiding in plain sight throughout America are historic, highly private women ' s self-education groups. These clubs are fascinating survivors from

an era following the Civil War when women couldn't apply to most colleges and were told they shouldn't leave the home. In their earliest days, the study groups also contributed to the welfare of their towns - often by helping to found their town's first library - and served to get women out of the house and into the world. Today's all-women study clubs have no civic component but still fashion their meetings as their founding great-grandmothers did, with members taking turns giving original papers. In *Smart Women*, author Ann Dodds Costello discusses her four-year quest to locate, often visit, and describe today's 100-year-old, all-women study clubs, all over America, even though they do not publicize and have no central organization or knowledge of each other. Included: an invaluable, first-ever directory of most

of the book's ninety-plus clubs.

The pharmaceutical industry relies on numerous well-designed experiments involving high-throughput techniques and *in silico* approaches to analyze potential drug targets. These *in silico* methods are often predictive, yielding faster and less expensive analyses than traditional *in vivo* or *in vitro* procedures. *In Silico Technologies in Drug Target Identification and Validation* addresses the challenge of testing a

growing number of new potential targets and reviews currently available in silico approaches for identifying and validating these targets. The book emphasizes computational tools, public and commercial databases, mathematical methods, and software for interpreting complex experimental data. The book describes how these tools are used to visualize a target structure, identify binding sites, and predict behavior. World-renowned researchers cover many topics not typically found in most informatics books, including functional annotation, siRNA design, pathways, text mining, ontologies, systems biology, database management, data pipelining, and pharmacogenomics. Covering issues that range from prescreening target

selection to genetic modeling and valuable data integration, *In Silico Technologies in Drug Target Identification and Validation* is a self-contained and practical guide to the various computational tools that can accelerate the identification and validation stages of drug target discovery and determine the biological functionality of potential targets more effectively. Daniel E. Levy, editor of the Drug Discovery Series, is the founder of DEL BioPharma, a consulting service for drug discovery programs. He also maintains a blog that explores organic chemistry. *Adventures of Huckleberry Finn* THE GREAT GATSBY THE GREAT GATSBYPURE SNOW PUBLISHING *Cambridge International AS*

A First Nations former hockey star looks back on his life as he undergoes treatment for alcoholism in this novel from the author of *Dream Wheels*. Saul Indian Horse is a child when his family retreats into the woods. Among the lakes and the cedars, they attempt to reconnect with half-forgotten traditions and hide from the authorities who have been kidnapping Ojibway youth. But when winter approaches, Saul loses everything: his brother, his parents, his beloved grandmother—and then his home itself. Alone in the world and placed in a horrific boarding school, Saul is surrounded by violence and cruelty.

At the urging of a priest, he finds a tentative salvation in hockey. Rising at dawn to practice alone, Saul proves determined and undeniably gifted. His intuition and vision are unmatched. His speed is remarkable. Together they open doors for him: away from the school, into an all-Ojibway amateur circuit, and finally within grasp of a professional career. Yet as Saul's victories mount, so do the indignities and the taunts, the racism and the hatred—the harshness of a world that will never welcome him, tied inexorably to the sport he loves. Spare and compact yet undeniably rich, Indian Horse is at once a heartbreaking account of a dark

chapter in our history and a moving coming-of-age story. "Shocking and alien, valuable and true... A master of empathy."—Jane Smiley, Pulitzer Prize-winning author of *Golden Age*

"A severe yet beautiful novel... Indian Horse finds the granite solidity of Wagamese's prose polished to a lustrous sheen; brisk, brief, sharp chapters propel the reader forward."—Donna Bailey Nurse, *National Post* (Toronto)

Lust in the Aisles

Zondervan
Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next

world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued. Freedom's Bittersweet Song HarperCollins

The past fifteen years have seen renewed interest in the civil rights movement. Television documentaries, films and books have brought the struggles into our homes and classrooms once again. New evidence in older

criminal cases demands that the judicial system reconsider the accuracy of investigations and legal decisions. Racial profiling, affirmative action, voting districting, and school voucher programs keep civil rights on the front burner in the political arena. In light of this, there are very few resources for teaching the civil rights at the university level. This timely and invaluable book fills this gap. This book offers perspectives on presenting the movement in different classroom contexts; strategies to make the movement come alive for students; and issues highlighting topics that students will find appealing. Including sample

syllabi and detailed descriptions from courses that prove effective, this work will be useful for all instructors, both college and upper level high school, for courses in history, education, race, sociology, literature and political science.

All animals are equal but some animals are more equal than others. It's just an ordinary farm - until the animals revolt. They get rid of the irresponsible farmer. The other animals are sure that life is improving, but as systems are replaced and half-truths are retold, a new hierarchy emerges . . .
