Learn How to Use Excel Macros to Automate Tedious Tasks

Excel macros have only one problem: they're tied to your computer, and they can't run in the Excel Web App or on your mobile device. And they're best at working on data already in your spreadsheet, making it difficult to get new data from your other apps into your spreadsheet.

For example, if you run a sum formula of A2 and B2 in cell C7, running the macro in the future will always sum A2 and B2 and display the results in C7. Macros can get very complex, and you can even use them to open other Office programs. When the macro is recording, virtually everything you do in Excel is added to the macro.

Excel Macros Tutorial: How to Record and Create Your Own ...

To start automating your Excel actions with macros, you'll need to "record" a macro. Recording a macro is how you tell Excel which steps to take when you run the macro. And while you can code a macro using Visual Basic for Applications (VBA), Excel also lets you record a macro by using standard commands. Let's take a look at a basic ...
