Two major trends have recently swept the travel world: the first, an overwhelming desire (thanks to Elizabeth Gilbert's bestseller, *Eat, Pray, Love*) to write one's own memoir; the second, an explosion of social media, blogs, twitter and texts, which allow travelers to document and share their experiences instantaneously. Thus, the act of chronicling one's journey has never been more popular, nor the urge stronger. *Writing Away: A Creative Guide to Awakening the Journal-Writing Traveler*, will inspire budding memoirists and jetsetting scribes alike. But *Writing Away* doesn't stop there—author Lavinia Spalding spins the romantic tradition of keeping a travelogue into a modern, witty adventure in awareness, introducing the traditional handwritten journal as a profoundly valuable tool for self-discovery, artistic expression, and spiritual growth. *Writing Away* teaches you to embrace mishaps in order to enrich your travel experience, recognize in advance what you want to remember, tap into all your senses, and connect with the physical world in an increasingly technological age. It helps you overcome writer's block and procrastination; tackle the discipline, routine, structure, and momentum that are crucial to the creative process; and it demonstrates how traveling—while keeping a journal along the way—is the world's most valuable writing exercise.

300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of

powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded "death by powerpoint."

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that

change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Economic, Environmental and Socio-cultural Impacts of Tourism: An Analysis from Mexico GRIN Verlag

Essay from the year 2005 in the subject Tourism, grade: 74%, University of Sunderland, 29 entries in the bibliography, language: English, abstract: Tourism is said to be the largest industry in the world. More and more people have the possibility to travel around the globe thanks to cheaper flights and increased leisure time. More than 760 million international tourist arrivals worldwide were counted in 2004 (WTO, 2005). According to the WTO, international tourism revenue reached a new record high of US \$ 622 billion in 2004. 52% of it was earned by Europe, 21% by the Americans, 20% by Asia and the Pacific, Africa and the Middle East contributed with 3% each (South African Tourism, 2005). Moreover, the tourism and travel industry supports directly and indirectly approximately 200 million jobs worldwide, this is 8% of the total employment at present, which is expected to grow to 260 million jobs in 2011 (Hall and Page, 2002). These figures give us a short impression of the importance of this sector. However, the tourism industry is very

volatile. Political changes, the opening of former communism countries like China or Cuba, permanent economic fluctuation as well as social, environmental and technological changes influence the tourism industry. Nowadays tourists prefer high quality standards, safety environments and interesting locations and are more concerned of environmental impacts (Gunn and Var, 2002). All the above mentioned facts show the necessity of effective and sustainable tourism planning. This assignment will assess the theories of strategic planning and will investigate its application in practice on the basis of two case studies. One case, The 'White Paper Plan' South Africa, is an example for good practice and the other, Disneyland Paris, is an example for bad practice.

The National Science Education Standards address not only what students should learn about science but also how their learning should be assessed. How do we know what they know? This accompanying volume to the Standards focuses on a key kind of assessment: the evaluation that occurs regularly in the classroom, by the teacher and his or her students as interacting participants. As students conduct experiments, for example, the teacher circulates around the room and asks individuals about their findings, using the feedback to adjust lessons plans and take other actions to boost learning. Focusing on the teacher as the primary player in assessment, the book offers assessment guidelines and explores how they can be adapted to the individual classroom. It features examples, definitions, illustrative vignettes, and practical suggestions to help teachers obtain the greatest benefit from this daily evaluation and tailoring process. The volume discusses how classroom assessment differs from conventional testing and grading-and how it fits into the larger, comprehensive assessment system.
