Thermoplastics and Thermoplastic Composites, Third Edition bridges the technology and business aspects of thermoplastics, providing a guide designed to help engineers working in real-world industrial settings. The author explores the criteria for material selection, provides a detailed guide to each family of thermoplastics, and explains the various processing options for each material type. More than 30 families of thermoplastics are described with information on their advantages and drawbacks, special grades, prices, transformation processes, applications, thermal behavior, technological properties (tenacity, friction, dimensional stability), durability (ageing, creep, fatigue), chemical and fire behavior, electrical properties, and joining possibilities. In this third edition, standards and costs have been updated for all materials, and more information on topics such as bioplastics, 3D printing and recycling have been added. In addition, an entirely new chapter on the concept of ‘ Industry 4.0 ’ has been added, with guidance and suggestions on the incorporation of virtualization, connectivity, and automation into the plastics engineering process to reduce materials and processing failure. Includes detailed case studies that illustrate best practices across a wide range of applications and industry sectors Presents a new chapter on the ‘ Industry 4.0 ’ concept Suggests software solutions to assist with design, decision-making and management, along with other forms of automation

The ways in which Internet traffic is managed have direct consequences on Internet users ’ rights as well as on their capability to compete on a level playing field. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users ’ freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how does it relates to human rights and free competition and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group, established under the aegis of the United Nations Internet Governance Forum (IGF).

Economics is the nexus and engine that runs society, affecting societal well-being, raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly. Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world. From a household budget to international trade, economics ranges from the micro- to the macro-level. It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia, which will explicitly approach economics through varied disciplinary lenses. Although there are encyclopedias of covering economics (especially classic economic theory and history), the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world, contemporary issues, and society.

Features: 4 volumes with approximately 800 signed articles ranging from 1,000 to 5,000 words each are presented in a choice of print or electronic editions Organized A-to-Z with a thematic Reader's Guide in the front matter groups related entries Articles conclude with References & Future Readings to

guide students to the next step on their research journeys

Cross-references between and among articles combine with a thorough Index and the Reader's Guide to enhance search-and-browse in the electronic version

Pedagogical elements include a Chronology of Economics and Society, Resource Guide, and Glossary

This academic, multi-author reference work will serve as a general, non-technical resource for students and researchers within social science programs who seek to better understand economics through a contemporary lens.

Can you tell the difference between talking to a human and talking to a machine? Or, is it possible to create a machine which is able to converse like a human? In fact, what is it that even makes us human? Turing's Imitation Game, commonly known as the Turing Test, is fundamental to the science of artificial intelligence. Involving an interrogator conversing with hidden identities, both human and machine, the test strikes at the heart of any questions about the capacity of machines to behave as humans. While this subject area has shifted dramatically in the last few years, this book offers an up-to-date assessment of Turing's Imitation Game, its history, context and implications, all illustrated with practical Turing tests. The contemporary relevance of this topic and the strong emphasis on example transcripts makes this book an ideal companion for undergraduate courses in artificial intelligence, engineering or computer science.

The 2014 Development Effectiveness Review (DEFR) is the eighth in a series of yearly reports by the Asian Development Bank (ADB) on its performance in achieving the priorities of Strategy 2020, its long-term strategic framework for 2008-2020. The results framework on which the DEFR is based was updated in 2014 to reflect the recommendations of the Midterm Review of Strategy 2020. The 2014 DEFR tracks recent development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where ADB's performance needs to be strengthened.

The Trojan Horse affair epitomises many of the questions and concerns expressed elsewhere about the changing school landscape and the overlapping roles of the organisations responsible for oversight of schools. No evidence of extremism or radicalisation, apart from a single isolated incident, was found by any of the inquiries and there was no evidence of a sustained plot nor of a similar situation pertaining elsewhere in the country. The Committee's report therefore covers the response of the Department for Education and Ofsted to the situation and wider lessons for the school system. The number of overlapping inquiries contributed to the sense of crisis and confusion, and the number of reports, coming out at different times and often leaked in advance, was far from helpful. The scope for coordination between inquiries by the Education Funding Agency, Ofsted and others is restricted by their statutory roles but more coordination could and should have been achieved. All the reports included recommendations that went far beyond the situation in the particular schools concerned and the DfE should draw together the recommendations from all the investigations and set out its response.

Some philosophers have thought that life could only be meaningful if there is no God. For Sartre and Nagel, for example, a God of the traditional classical theistic sort would constrain our powers of self-creative autonomy in ways that would severely detract from the meaning of our lives, possibly even evacuate our lives of all meaning. Some philosophers, by contrast, have thought that life could only be meaningful if there is a God. God and the Meanings of Life is interested in exploring the truth in both these schools of thought, seeking to discover what God could and couldn't do to make life meaningful (as well as what he would and wouldn't do). Mawson espouses a version of the 'amalgam' or 'pluralism' thesis about the issue of life's meaning – in essence, that there are a number of different legitimate meanings of 'meaning' (and indeed 'life') in the question of life's meaning. According to Mawson, God, were he to exist, would help make life meaningful in some of these senses and hinder in some others. He argues that whilst there could be meaning in a Godless universe, there could be other sorts of meaning in a Godly one and that these would be deeper.

Sovereign Wealth Funds (SWFs) represent both an increasingly important - and potentially dominant - category of alternative investor, and a novel form for governments to project their interests both home and abroad. As such, they represent both economic actors and embody power vested in the financial and diplomatic resources they can leverage. Although at times they have acted in concert with other alternative investors, their intergenerational savings function should, in theory at least, promote more long-termist thinking. However, they may be impelled in towards greater short termism, in response to popular pressures, demands from predatory elites and/or unforeseen external shocks. Of all the categories of alternative investment, SWFs perhaps embody the most contradictory pressures, making for diverse and complex outcomes. The aim of this volume is to consolidate the present state of the art, and advance the field through new applied, conceptual and theoretical insights. The volume is ordered into chapters that explore thematic issues and country studies, incorporating novel insights in on the most recent developments in the SWF ecosystem. This handbook is organized into four sections and 23 chapters. The four sections are: Governance of SWFs, Political and Legal Aspects of SWFs, Investment Choices and Structures of SWFs, Country and Regional Analyses of SWFs.

In the autumn of 2014, thousands of people, young and educated in their majority, occupied the chief business district and seat of the government in Hong Kong. The protest, known as the Umbrella Movement, called for ‘genuine democracy’, as well as a fairer social and economic system. The book aims to provide a dynamic framework to explain why socioeconomic forces converged to produce such a situation. Examining increasing inequality, rising prices and stagnating incomes, it stresses the role of economic and social factors, as opposed to the domestic political and constitutional issues often assumed to be the root cause behind the protests. It first argues that globalization and the increasing influence of China’s economy in Hong Kong has weighted on salaries. Second, it shows that the oligopolistic nature of the local economy has generated rents, which have reinforced inequality. The book demonstrates that the younger generation, which is still finding its place in society, has been particularly affected by these phenomena, especially with social mobility at a low point. Offering a new approach to studying the Umbrella Movement, this book will appeal to students and scholars interested in Hong Kong's political landscape, as well Chinese politics more broadly.

Assembling compelling and unprecedented evidence, "Political Standards: Accounting for Legitimacy" documents how in subtle ways the rules of corporate accounting a critical institution in modern market capitalism have been captured to benefit industrial corporations, financial firms, and audit firms. In what is perhaps the only independent overview of the accounting industry, Karthik Ramanna begins with a history of corporate accounting and an accessible explanation of how it works today, including the essential roles it plays in defining the fundamental notion of profitability, facilitating asset allocation, and ensuring the accountability of corporations and their managers. From the evidence, Ramanna shows how accounting rule-makers selectively co-opt conceptual arguments from academia and elsewhere to advance the views of the special-interest groups. From this, Ramanna moves on to develop more broadly a new type of regulatory challenge that of producing public policy in a thin political market. His argument is that accounting rules cannot be determined without the substantial expertise and experience of groups that by definition also have strong commercial interests in the outcome." Political Standards" concludes with an exploration of possible solutions to the problem in accounting and that of thin political markets in general, charting avenues for scholarship and practice. Certain to be an eye-opening account of a massive industry central to the modern business world, "Political Standards "will be an essential resource in understanding how the rules of the game business are set, whom they inevitably favor, and how they can be changed for the better of society."
