accessible book, Gosetti-Ferencei offers a new vision of existentialism.

As she lucidly demonstrates, existentialism is a rich and diverse philosophy that encourages meaningful engagement with the world around us, offering a host of fascinating concepts that pertain to life as we experience it. The movement was as heterogeneous as it is now misunderstood, influenced by jazz music, involving diverse thinkers from around the world, challenging received ideas about the meaning of human existence. Part of the difficulty in defining existentialism is that it was never a unified philosophy, but came to identify a set of shared concerns about the meaning and possibility of human freedom, as it may be expressed in authentic choices, actions, and projects. Existentialists all explored how, in the absence of traditional reassurances about the meaning of life, we may transcend our present circumstances, and give our situation new meaning. With

We Have Only This Life to Live Oxford University Press

While existentialism has long been associated with Parisian Left Bank philosophers sipping cocktails in smoke-filled cafés, or with a brooding, angst-filled outlook on life, Gosetti-Ferencei shows how vital and heterogeneous the movement really was. In this concise,

existentialism, concrete, lived experience of the single individual emerged from the shadow of abstract systems and long-defended traditions, and became subject-matter in its own right for philosophical inquiry. Far from solipsistic, Gosetti-Ferencei shows that existentialist attention to the human self can be intertwined with ways of conceiving the world, our being with others, the earth, and the encompassing concept of being. Fully appreciating what existentialism has to offer requires recognizing the rich diversity of its prospects, which involve not only anxiety, absurdity, awareness of death and the loss of religious meaning, but also hope, the striving for happiness, and a sense of the transcendent. On Being and Becoming unpacks this philosophical movement's insights, and reveals how its core ideas promote creative responses to the question of life's meaning.

Jean-Paul Sartre Philosophical Library/Open Road

Philosopher, novelist, dramatist and existentialist Jean-Paul Sartre is one of the greatest writers of all time. He was fascinated by the role played by the emotions in human life and placed them at the heart of his philosophy. This brilliant short work - which contains some of the principal ideas later to appear in his masterpiece Being and Nothingness - is Sartre at his best: insightful, engaging and controversial. Far from constraining one's freedom, as we often think, Sartre argues that emotions are fundamental to it and that an emotion is nothing less than 'a transformation of the world'. With a new foreword by Sebastian Gardner.

Socrates Meets Sartre Oxford University Press on Demand

Webber argues for a new interpretation of Sartrean existentialism. On this reading, Sartre is arguing that each person's character consists in the projects they choose to pursue and that we are all already aware of this but prefer not to face it. Careful consideration of his existentialist writings shows this to be the unifying theme of his

theories of consciousness, freedom, the self, bad faith, personal relationships, existential psychoanalysis, and the possibility of authenticity. Developing this account affords many insights into various aspects of his philosophy, not least concerning the origins, structure, and effects of bad faith and the resulting ethic of authenticity. This discussion makes clear the contributions that Sartre's work can make to current debates over the objectivity of ethics and the psychology of agency, character, and selfhood. Written in an accessible style and illustrated with reference to Sartre's fiction, this book should appeal to general readers and students as well as to specialists.

Make Waves Ignatius Press

A collection of essays by Jean-Paul Sartre that touch upon the subject of existentialism by looking at aesthetics, emotions, writing, phenomenology, and perception The Philosophy of Existentialism collects representative essays on Jean-Paul Sartre's pioneering subject: existentialism. Beginning with a thoughtful introduction by fellow French philosopher Jean Wahl, this work looks at existentialism through several lenses, exploring topics such as the emotions, imagination, nothingness, freedom, responsibility, and the desire to be God. By providing exposition on a variety of subjects, The Philosophy of Existentialism is a valuable introduction to Sartre's ideas.

Transcending Reason Open Road Media

What is Existentialism? It is perhaps the most misunderstood of modern philosophic positions—misunderstood by reason of its broad popularity and general unfamiliarity with its origins, representatives, and principles. Existential thinking does not originate with Jean Paul Sartre. It has prior religious, literary, and philosophic origins. In its narrowest formulation it is a metaphysical doctrine, arguing as it does that any definition of man's essence must follow, not precede, an estimation of his existence. In Heidegger, it affords a view of Being in its totality; in Kierkegaard an approach to that inwardness indispensable to authentic religious experience; for Dostoevsky, Kafka, and Rilke the existential situation bears the stamp of modern man's alienation, uprootedness, and absurdity; to Sartre it has vast ethical and political implications. Walter Kaufmann, author of Nietzsche, is eminently qualified to present and interpret the insights of existentialism as they occur and are deepened by the major thinkers who express them. In every case complete selections or entire works have been employed: *The Wall*, *Existentialism*, and the complete chapter on "Self-Deception" from *L'Être et le Néant* by Sartre; two lectures from Jaspers' book *Reason and Existenz*; original translations of *On My Philosophy* by Jaspers and *The Way Back into the Ground of Metaphysics* by Heidegger. There is, as well, material

from Dostoevsky, Kierkegaard, Nietzsche, Rilke, and Camus.

Existential Psychoanalysis SB-The French List

One of the leading twentieth-century French existentialist philosophers examines how human emotions shape our existence. In *The Emotions: Outline of a Theory*, French philosopher Jean-Paul Sartre attempts to understand the role emotions play in the human psyche. Sartre analyzes fear, lust, anguish, and melancholy while asserting that human beings begin to develop emotional capabilities from a very early age, which helps them identify and understand the emotions' names and qualities later in life. Helping to complete the circle of Sartre's many theories on existentialism, this vital piece of literature is a must-have for the philosopher-in-training's collection.

"Why is my pain perpetual, and my wound incurable, which refuseth to be healed?" -Jeremiah "Existentialism" today refers to faddism, decadentism, morbidity, the "philosophy of the graveyard"; to words like fear, dread, anxiety, anguish, suffering, aloneness, death; to novelists such as Jean-Paul Sartre, Dostoevski, Camus, Kafka; to philosophers like Kierkegaard, Heidegger, Marcel, Jaspers, and Sartre-and because it refers to, and is concerned with, all of these ideas and persons, existentialism has lost any clearer meaning it may have originally possessed. Because it has so many definitions, it can no longer be defined. As Sartre writes: "Most people who use the word existentialism would be embarrassed if they had to explain it, since, now that the word is all the rage, even the work of a musician or painter is being called existentialist. A gossip columnist . . . signs himself The Existentialist, so that by this time the word has been so stretched and has taken on so broad a

meaning, that it no longer means anything at all. " 2 This state of definitional confusion is not an accidental or negligible matter. An attempt will be made in this introduction to account for the confusion and to show why any definition of existentialism involves us in a tangle. First, however, it is necessary to state in a tentative and very general manner what points of view are here intended when reference is made to existentialism.

Critical Essays (Situations I) contains essays on literature and philosophy from a highly formative period of French philosopher and leading existentialist Jean-Paul Sartre's life, the years between 1938 and 1946. This period is particularly interesting because it is before Sartre published the magnum opus that would solidify his name as a philosopher, Being and Nothingness. Instead, during this time Sartre was emerging as one of France's most promising young novelists and playwrights--he had already published Nausea, The Age of Reason, The Flies, and No Exit. Not content, however, he was meanwhile consciously attempting to revive the form of the essay via detailed examinations of writers who were to become central to European cultural life in the immediate aftermath of World War II.

Collected here are Sartre's experiments in reimagining the idea and structure of the essay. Among the distinguished writers he analyzes are Francis Ponge, Georges Bataille, Vladimir Nabokov, Maurice Blanchot, and, of course, Albert Camus, whose novel The Stranger Sartre endeavours to explain in these pages. Critical Essays (Situations I) also contains a famous attack on the Catholic novelist François Mauriac, studies of the great American literary

iconoclasts Faulkner and Dos Passos, and brief but insightful essays on aspects of the philosophical writings of Husserl and Descartes. This new translation by Chris Turner reinvigorates the original skill and voice of Sartre's work and will be essential reading for fans of Sartre and the many writers and works he explores. "For my generation he has always been one of the great intellectual heroes of the twentieth century, a man whose insight and intellectual gifts were at the service of nearly every progressive cause of our time."--Edward Said

Existentialism For Beginners Oxford University Press

In the famous conclusion to Being and Nothingness, Jean-Paul Sartre announced that he would devote his next philosophical work to moral problems. Although he worked on this project in the late 1940s, Sartre never completed it to his satisfaction, and it remained unpublished until after his death in 1980. Presented here for the first time in English, Notebooks for an Ethics is Sartre's attempt to articulate a moral philosophy. In the Notebooks he addresses any number of themes and topics relevant to an effort to formulate a concrete and revolutionary socialist

ethics, among them the differences between force and violence, the relationship of means and ends, and the relationship of oppression and alienation. Most important, he tries to show that there can be an authentic mutual recognition among free individuals where no one steals another's freedom. While remaining committed to the basic principles of Being and Nothingness, Sartre here seeks to locate the foundation for action in history and society. The Notebooks thus form an important bridge between the early existentialist Sartre and the later Marxist social thinker of the Critique of Dialectical Reason. Sartre grapples anew with such central issues as "authenticity" and the relation of alienation and freedom to moral values. In dealing with fundamental modes of relating to the Other, among them violence, entreaty, demand, appeal, refusal, and revolt, he highlights the notions of conversion and creation as they figure in the necessary transition from individualism to historical consciousness. The Notebooks themselves are complemented here by two appendixes, one on "the good and subjectivity", the other on the problem of blacks in the United States as a case study of oppression.
