Nursing and Informatics for the  
21st Century Series is a critical**

---

resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, *Nursing Education and Digital Health Strategies* explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and

---

interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.

Irishness and  
Womanhood in  
Nineteenth-century  
British Writing eBook  
Partnership  
Using Lady Morgan's  
The Wild Irish Girl as  
his point of departure,  
Thomas J. Tracy  
argues that nineteenth-  
century debates over  
what constitutes  
British national identity  
often revolved around  
representations of  
Irishness, especially  
Irish womanhood. He  
maps the genealogy of

this development in  
fiction, political  
discourse, and the  
popular press, from  
Edgeworth's Castle  
Rackrent through  
Trollope's Irish novels,  
focusing on the pivotal  
period from 1806  
through the 1870s.

Earth Day  
Independently Published  
This book is neither autobiography nor a family history. It is a short account of an unusual childhood and the experience of being born into a family living in a repressive political system. The family members faced many restrictions in their daily lives but, in other

---

respects, managed to avoid the worst excesses of the Communist regime. The book recounts how, despite many limitations, the author and her brother were protected, encouraged to flourish and were not held back by a hostile political environment until their adult years. The book recalls the high and low points of life behind the Iron Curtain in one of the least politically conformist countries of the Soviet controlled Eastern Europe. The work records how dramatically life had changed in a previously cut-off society which, nevertheless, had always held high hopes for future progress.
