Nursing and Informatics for the 21st Century, 3rd Edition - Book 2 Wiley

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-

enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.

Dance, Music and Cultures of Decolonisation in the Indian Diaspora provides fascinating examples of dance and music projects across the Indian Diaspora to highlight that decolonisation is a creative process, as well as a historical and political one. The book analyses creative processes in decolonising projects, illustrating how dance and music across the Indian Diaspora articulate socio-political aspirations in the wake of thinkers such as Gandhi and Ambedkar. It presents a wide range of examples: post-apartheid practices and experiences in a South African dance company, contestations over national identity politics in Trinidadian music competitions, essentialist and assimilationist strategies in a British dance competition, the new musical creativity of second-generation British-Tamil performers, Indian classical dance projects of reform and British multiculturalism, feminist intercultural performances in Australia, and performance re-enactments of museum exhibits that critically examine the past. Key topics under discussion include postcolonial contestations, decolonising scholarship, dialogic pedagogies and intellectual responsibility. The book critically reflects on decolonising aims around respect, equality and the colonial past's redress as expressed through performing arts projects. Presenting richly detailed case studies that underline the need to examine creative processes in the cultures of decolonisation, Dance, Music and Cultures of Decolonisation in the Indian Diaspora will be of great interest to scholars of South Asian Studies, Diaspora Studies, Performing Arts Studies and Anthropology. The chapters were originally published as a special issue of South Asian Diaspora.

Weird But True 1: Expanded Edition Simon and Schuster

From Sia to Elton John, from Billie Holiday to David Bowie, LGBT musicians have changed the course of modern music. But before their music—and the messages behind it—gained understanding and a place in the mainstream, how did the queer musicians of yesteryear fight to build foundations for those who would follow them? David Bowie Made Me Gay is the first book to cover the breadth of history of recorded music by and for the LGBT community. Darryl W. Bullock reveals the stories of both famous and lesser-known LGBT musicians, whose perseverance against the threat of persecution during decades of political and historical turmoil—including two world wars, Stonewall, and the AIDS crisis—has led to some of the most significant and soul-searching music of the last century. Bullock chronicles these struggles through new interviews and archival reports, dating from the birth of jazz in the red-light district of New Orleans, through the rock 'n' roll years, Swinging Sixties, and disco days of the '70s, right up to modern pop, electronica, and reggae. An entertaining treasure-trove of untold history for all music lovers, David Bowie Made Me Gay is an inspiring, nostalgic, and provocative story of right to be heard and the need to keep the fight for equality in the spotlight.

"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--
