Introduction to Chemical Engineering Thermodynamics presents comprehensive coverage of thermodynamics from a chemical engineering viewpoint. The text provides a thorough exposition of the principles of thermodynamics, and details their application to chemical processes. The chapters are written in a clear, logically organized manner, and contain an abundance of realistic problems, examples, and illustrations to help students understand complex concepts. This text is structured to alternate between the development of thermodynamic principles and the correlation and use of thermodynamic properties as well as between theory and applications.

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a back drop for a new collection of nostalgic short stories.

Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge,

including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.

Scorcher by Tim Ross Cengage Learning

Beneath a crimson sun lie wastelands of majestic desolation and cities of cruel splendor, where heroes must battle the horrible monsters and vicious raiders who roam the desert, while in the cities undying sorcerer-kings crush any who dare to oppose them. This is Athas, the unrelenting world of the Dark Sun®; a world shaped by inherently destructive magic, and ruled by intrinsic evil. In such a world, the forces of good—and the heroes who emerge in this unforgiving land—fight not only for themselves, but for life of the world itself. Aric, is a half-elf with a rare natural ability with the psionic discipline known as "the Way." When Aric is brought into a quest to search for a priceless trove weapons, he would rather keep his head down and live a simple life. But nothing is simple in the city of Nibenay with its reclusive ruler known as the Shadow King. And in a world where metal is the rarest of commodities, Aric's "way" with metal is an even rarer talent. Enlisted by the Shadow King himself to seek out this cache of metal weaponry, Aric heads into the desert with a treacherous band of adventurers. Allegiances are tested and secrets are uncovered. But sometimes the secrets hidden by the sands of time should remain undiscovered. When Aric and his band uncover an evil perhaps greater than the Shadow King himself, it is a race against time to see who will harness its power.

The primary goal of this GO! Series title is to teach Microsoft PowerPoint 2007 quickly and easily, with an approach that is based on clearly-defined projects. A key feature of the book is the use of Microsoft procedural syntax: steps begin with where the action is to take place, followed by the action itself. The instruction is error-free, clearly written, and logically arranged. This book provides users with the skills to solve business problems using the computer as a tool. GO! with Microsoft PowerPoint 2007, Brief, 1/e contains a CD-ROM for additional learning opportunities. This edition covers the following topics: getting started with PowerPoint; designing a presentation; formatting a presentation using animation, tables, and charts. Ideal for students and individuals seeking a project-based introduction to PowerPoint 2007.
