This is the idea that one could do a local experiment to detect cosmological expansion of space. But it is not possible. This then makes the idea of EoS problematic. I reviewed evidences (Hartnett 2011b; 2011c) for and against the notion of expansion of space and at that time I considered it the mechanism for the expansion of the universe.

Expanding Universe Answers

My answer is the Universe is not expanding. Asked in Astronomy, Gravity Is the universe is expanding because of gravity? We do not yet know why the universe is expanding. We cannot even be certain ...
