The European Space Agency has a long history of human spaceflight, working with both NASA and the Soviet/Russian space agencies over the years. This book tells the story of the ESA astronauts who have visited the International Space Station and their contributions to its development and success. For example, ESA built the Columbus science laboratory, as well as the Cupola, the Leonardo PMM and the ATV supply ship. But it is the human endeavor that captures the imagination. From brief visits to six-month expeditions and spacewalking to commanding Earth's only outpost in space and doing

experiments, ESA astronauts – whose personal stories are also told – have played a vital role in the international project. Many of their efforts are documented in photographs in the book. In following up on the missions covered in this author's earlier title, In the Footsteps of Columbus (2016), this book highlights European missions from the 2013 Volare mission of Luca Parmitano to his 2019 Beyond mission and includes first flights for Alexander Gerst, Samantha Cristoforetti, Andreas Mogensen, Tim Peake, and Thomas Pesquet. **Antarctic Journal of the United States Allied Publishers**

Expedition Britannic is an insight into the art of deep wreck diving which features incredible original photographs of the largest ocean liner on the seabed. What does it take to dive Titanic 's sister ship? This huge vessel from a bygone golden age of ocean travel lies at over 100 metres (330 ') below the surface. It is not a dive for the faint-hearted. Requiring meticulous planning, precise execution and good conditions, only the most capable technical divers will ever experience it. Even then, tragically some do not make it back to the surface. Expedition Britannic is the story of the May 2019 mission to dive the Olympic-class liner-turned-hospital ship, HMHS Britannic. Sunk near the Greek island of Kea during World War I, she will only be ticked off the bucket list of relatively few of the most dedicated deep divers. Steeped in history, the opportunity to see a largely intact near-replica of the world 's most famous ocean liner makes it an ultimate dive to aspire to. Deep wreck photography specialist Rick Ayrton is one such diver. Assisted by expedition leader Scott Roberts, he takes us through the planning, logistics and preparation essential for scaling one of the pinnacles of wreck diving. Then we explore the wreck with him — going deeper than most divers will in their lifetimes to photograph this once great ship — and make new discoveries. Reviews of Expedition Britannic A cracking book that will be of interest to any diver, and many others. From my perspective, if I need to persuade anyone why I love deep diving then I ' ll simply hand them a copy and wait for them to ask how they can sign up.— SCUBA magazine. Expedition Britannic brings armchair divers closer than we ' ve ever been to this magnificent wreck and perhaps will inspire one or two to get out of their armchair and experience it for themselves.— Encyclopaedia Titanica. If you have read detailed reports of group technical-diving trips before, this has something in common with those but it is done extremely well. The writing is crisp, well-organised and doesn ' t get bogged down in needless detail. While it doesn ' t seem to be making concessions, it is readily accessible to any level of diver or even non-divers. And bringing it further to life, the photography from depth is way beyond what we usually expect, thanks to Ayrton ' s dedication to his craft.— Diver magazine. Expedition Britannic will appeal to recreational divers who look up (or rather, down) in awe at our technical cousins; it will appeal to technical divers wishing to see how it was done; and it will certainly appeal to White Star line aficionados who want a fresh look at how Britannic appears today.— British Diver. Incredible... the images are stunning. But the really impressive achievement is to make it accessible for non-technical divers whilst also having all the detail that more experienced ones will want.— Dominic Robinson, Officer in Charge Joint Service Sub Aqua Diving Centre / BSAC Technical Chief Examiner. A marvellous way to help visualise one of the great diving treasures and archaeological monuments ... it can only help to prepare any dive team contemplating their own visit to the ' Mount Everest ' of technical diving.— Simon Mills, maritime historian, owner of HMHS Britannic. (Read full review) Rick ' s scooter driven photographic epic is a fresh take on a wreck that many of us are familiar with, but are also distant from. You see things from a new viewpoint: the whole foredeck; the propellers from below; a new angle showing there is plenty of life left in ' the old girl ' . Nice one! — Kieran Hatton, www.divingindepth.co.uk I will never forget Rick Ayrton ' s photographs. It was what we were waiting for every day, after every dive.— Yannis Tzavelakos

"Your problem is you don't know your problem." – the response Manthan Desai, a young engineer, got while seeking advice from his favourite professor about implementing Six Sigma, a breakthrough business improvement strategy to fix the chronic problem of late deliveries at his company, Minewell Pvt. Ltd. "We are a corporate house, not a research and development institute and profits matter here, not the discoveries." – and this was the reaction of the MD of Minewell Pvt. Ltd. to Desai's sincere efforts to move the firm out of the crisis by experimenting with Six Sigma methodology. Apart from embracing a tough mission of developing critical products of mining machinery as his first professional assignment, full of

challenges and complexities coupled with life-threatening experiences at highly uncomfortable and dangerous mining fields, Desai, our young engineer, also encounters with Minewell's chronic problem of late deliveries. They are miserably failing to maintain the delivery commitments made to their customers. He experiments with Six Sigma breakthrough business improvement strategy to save the jeopardizing business of Minewell, first by understanding the theory and then convincing the company management to go for it. Let's see how far Desai can go with his tool kit backed up by his 'nothing but excellence' attitude and ASK theory as taught by his father.

"The Armada campaign pitted Europe's mightiest military power against Christendom's most powerful navy in a battle for different ideals of civilisation. Both protagonists expected the clash to be decisive; neither, as it soon became apparent, knew how to fight a battle whose scale and character were beyond the

experience of anyone in the two fleets. What ensued was not the heroic encounter of legend, but an inconclusive affair, redeemed - for England - by atrocious weather and poor Spanish understanding of the coastlines of western Scotland and Ireland."--BOOK JACKET.
