Committee Serial No. 89-59. Hearings were held in Denver, Colo.

Proceedings of Snellius-II Symposium MSU Press  
Scientist, explorer, historian, and Indian agent Henry Rowe Schoolcraft's name must be included in the pantheon of early nineteenth-century adventurers who were in the vanguard of American expansion into the heart of the continent. While some, individuals like William Clark, Meriwether Lewis, John C. Fremont, and Kit Carson did not stop until they reached the Pacific Ocean, others took it as their task to explore the cast, unknown interior; chief among this group was Henry Rowe Schoolcraft. Originally issued by Michigan State University Press in 1958, Schoolcraft's Expedition to Lake Itasca contains a semi-official report of his 1832 trip to the upper Mississippi region. His purposes for exploring the area, now part of Minnesota, were to quell a feud between warring Chippewa and Sioux factions and to locate the Mississippi headwaters. Although he did not stop the fighting, Schoolcraft did discover the river's true source and left us an unsurpassed account of life in the region in the 1830s. Anyone interested in the early white exploration of the upper Midwest should own a copy of this valuable resource.

Defender Edition Stackpole Books

This book examines the little studied story of Bellinghausen, and includes the fullest biography of the celebrated Russian explorer ever published, and with thoughtful discussion of the achievements and limitations of the expedition and suggestions for further research.

Cambridge University Press

The Arctic became part of Canada in 1880 when it was transferred from Britain. How the transfer came about and what Canada did with its new territory is described. The book focuses on the ten marine expeditions that the Dominion government sent north between 1884 and 1912 and examines what these expeditions accomplished.
