PEERS® for Young Adults Penguin The National Book Critics Circle Award – winning author delivers a collection of essays that serve as the perfect “antidote to mansplaining” (The Stranger). In her comic, scathing essay “Men Explain Things to Me,” Rebecca Solnit took on what often goes wrong in conversations between men and women. She wrote about men who wrongly assume they know things and wrongly assume women don’t, about why this arises, and how this aspect of the

gender wars works, airing some of her own hilariously awful encounters. She ends on a serious note—because the ultimate problem is the silencing of women who have something to say, including those saying things like, “He’s trying to kill me!” This book features that now-classic essay with six perfect complements, including an examination of the great feminist writer Virginia Woolf’s embrace of mystery, of not knowing, of doubt and ambiguity, a highly original inquiry into marriage equality, and a terrifying survey of the scope of

contemporary violence against women. “In this series of personal but unsentimental essays, Solnit gives succinct shorthand to a familiar female experience that before had gone unarticulated, perhaps even unrecognized.” —The New York Times “Essential feminist reading.” —The New Republic “This slim book hums with power and wit.” —Boston Globe “Solnit tackles big themes of gender and power in these accessible essays. Honest and full of wit, this is an integral read that furthers the conversation on feminism and

Ten-year-old Sadie Meadows is reading in bed on New Year's Eve when she notices an unopened present beneath her window. She finds it contains a book called *The World from Your Bedroom - There and Back Again*, but when she opens it up and begins to read, she is disappointed to see

it is nothing more than a travel book packed with pages detailing hundreds of places across the world. She reads the first page, then puts the book down just as sleep claims her at the instant that the New Year arrives. She awakes to find that, instead of being in her bedroom at home in Skipton, somehow she has been transported to Ireland, the location that she had just read about in the book. There follow a series of adventures, each set in a different location, as Sadie finds herself travelling across the globe as she attempts to get back home again. This month sees her journeying

across China and the Far East into the Indian subcontinent and the Middle East.

inspiration at work -- and in turn inspire those around you. I believe fulfillment is a right and not a privilege. We are all entitled to wake up in the morning inspired to go to work, feel safe when we're there and return home fulfilled at the end of the day. Achieving that fulfillment starts with understanding exactly WHY we do what we do. As Start With Why has spread around the world, countless readers have asked me the

same question: How can I apply Start With Why to my career, team, company or nonprofit? Along with two of my colleagues, Peter Docker and David Mead, I created this hands-on, step-by-step guide to help you find your WHY. With detailed exercises, illustrations, and action steps for every stage of the process, Find Your Why can help you address many important concerns, including: \* What if my WHY sounds just like

my competitor's? \* Can I have more than one WHY? \* If my work doesn't match my WHY, what should I do? \* What if my team can't agree on our WHY? Whether you've just started your first job, are leading a team, or are CEO of your own company, the exercises in this book will help guide you on a path to long-term success and fulfillment, for both you and your colleagues. Thank you for joining us as we work together to

In this detective novel set in a small, intense seminar, eight students study what their professor regards as the central mystery of human nature: the uniqueness of the individual. One morning a woman student who has been fighting this idea and disrupting the seminar keels over, poisoned. The

detective who takes charge is himself a writer who finds this tight little world of academic criticism and theory fascinating, baffling, yet somehow sympathetic. Together he and the professor explore the minds and writings of the people in the seminar in order to track the murderer, then another body is found, pointing them in a different direction.

of her colleagues describe learners (who range in age from five to adulthood) coming to connect with different subject matters—from politics to poetry, medicine to mapping. Their findings not only provide good readable stories, but also offer a unique look at people involved in real learning. “Duckworth and colleagues illustrate, with powerful and lively teaching examples, how theory related to the construction of knowledge by students can be implemented in the classroom. This book is a singular contribution to the literature on teaching and

learning.” —James A. Banks, University of Washington, Seattle “Duckworth has given us case studies of ‘mid-wife’ teaching at its very best. We see the fledgling ideas actually developing and gaining strength. Duckworth articulates her craft with the greatest care and insight. She gives her readers the sense they themselves are attendant at the birth of ideas, the miracle of creation.” —Mary Field Belenky, co-author of *Women’s Ways of Knowing* “Tell Me More is a fascinating and pioneering account of people working together over many weeks, struggling to invent ideas. This book is a must read

for teachers and others who want to come to grips with fundamental problems facing all undefeated educators: What is thinking? How does it grow?” —Howard E. Gruber, Teachers College, Columbia University “These essays, in their concrete dailyness, give us a vision of what’s possible, some crafterly advice about how to proceed, and the courage to try.” —Deborah Meier, Principal, Mission Hill Elementary School, Boston

In this thrilling installment of the #1 bestselling series, chief medical examiner Dr. Kay Scarpetta finds herself a reluctant star witness in a sensational televised murder trial causing chaos in Old Town Alexandria

with the threat of violent protests. Chief medical examiner Kay Scarpetta is the reluctant star witness in a sensational murder trial when she receives shocking news. The judge's sister has been found dead. At first glance, it appears to be a home invasion, but then why was nothing stolen, and why is the garden strewn with dead plants and insects? Although there is no apparent cause of death, Scarpetta recognizes telltale signs of the unthinkable, and she knows the

worst is yet to come. The forensic pathologist finds herself pitted against a powerful force that returns her to the past, and her time to catch the killer is running out . . .

Forget the 10,000 hour rule— what if it's possible to learn the basics of

any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language,

play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this

---

book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the

skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an

airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.
