Dr. Joanne Settel has all the answers to our most burning questions in this wacky and informative book of poems about our digestive systems. Have you ever wondered... Why spicy foods can make you sweat? Why garlic makes your breath so stinky? Just how long your long intestine is? What a pizza slice looks like...going down? Why food tastes different when you have a cold? With fascinating details, catchy rhymes, and quirky illustrations by Steve Björkman, acclaimed author Joanne Settel answers all of these questions (and more!) in this engrossing, fun exploration of the science of our digestive systems. When she's through, you won't believe what your guts can do—or what you can stomach!

[Circulatory, Digestive & Reproductive Systems: The Digestive System – Mouth to Stomach - Google Slides Gr. 5-8](#) Graphic Science 4D

How long are your intestines? Why are healthy teeth so important to the digestive system? How does alcohol affect the digestive system? Investigate the miracles of the human body with Body Focus. Find out about the body parts and systems that enable us to eat, run, jump, think, and feel. Discover what sort of things can go wrong with our bodies, form common illnesses to more unusual problems. The Digestive System explores the structure of the different parts of the digestive system, looking at how they work together to digest the food we eat. It explains the different illnesses and injuries that can affect your digestion, from indigestion to ulcers, and outlines ways to keep healthy, including the importance of a balanced diet.--

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

**One Hundred One Questions about Food and Digestion that Have Been Eating at You-- Until Now** The Rosen Publishing Group, Inc

When talking about the digestive system, a few topics must be covered: vomit, the intestines, and poop! All readers can enjoy these and many more topics about the grossest of the body systems in this friendly, fun fact format. From the mouth and esophagus to the small and large intestine, readers take a journey through the human body via the digestive tract, and enjoy learning about processes the digestive system does without us even knowing. The bright images and labeled diagrams encourage body literacy and support science classroom learning.

[So What Should I Eat? The Digestive System Explained | Children's Science Books Grade 4 |](#)

[Children's Anatomy Books](#) Enslow Publishing, LLC

The human digestive system plays an important role in processing food in order to provide nutrients that the body can use. This well-illustrated text presents the basics of anatomy, physiology and disease of the human digestive system by answering a series of questions relevant to the various components of this system. For example, in studying the stomach, the following questions are examined: 1) Where is the stomach located? 2) What does the stomach look like? 3) What does the stomach do? 4) Where do gastric juices come from? 5) What causes ulcers? 6) What causes a stomach ache? and 7) What causes burping? Additionally, most chapters are filled with unusual trivia related to the part of the body being discussed. For example, there was a 42-year-old woman who complained of mild abdominal pain and had 2533 objects removed from her stomach, including 947 pins. The text provides a fun and interesting way to learn more about the digestive system. The text is ideal, whether you are looking for an entertaining and informative read on the workings of the human digestive tract or looking for a text or resource for biology or health classes.

\*\*This is a Google Slides version of the "The Digestive System – Mouth to Stomach" chapter from the full lesson plan Circulatory, Digestive & Reproductive Systems\*\* Our resource breaks down each system of the human body to make it easier to understand as a whole. Discover how the food we eat travels down to our stomach and gets digested. All of our content is reproducible and aligned to your State Standards and are written to Bloom's Taxonomy. About GOOGLE SLIDES: This resource is for Google Slides use. Google Slides is free with a Google email account. We recommend having Google Classroom in addition to Google Slides to optimize use of this resource. This will allow you to easily give assignments to students with a click of a button. This resource is comprised of interactive slides for students to complete activities right on their device. It is ideal for distance learning, as teachers can share the resource remotely with their students, have them complete it and return, where the teacher can mark it from any location. What You Get: • An entire Google™ Slides presentation with reading passages, comprehension questions and drag and drop activities that students can edit and send back to the teacher. • A start-up manual, including a Teacher Guide on how to use Google Slides for your classroom, and an Answer Key to go along with the activities in the Google Slides document.

[Disgusting Digestion](#) Prentice Hall

After eating your favorite healthy snack, how does the body know where all the nutrients should go? The digestive system is a network of organs that works with other systems to feed the body the nutrients it needs to survive! Follow along as diagrams show the path food takes as it is broken down into usable parts. A close-up feature looks at the nutrient-absorbing cilia that line the small intestine. Pick up this title today to discover how our bodies get the energy to learn and grow!

**The Human Digestive System** New Leaf Publishing Group

The fourth volume of the Wonders of the Human Body series dives deep into why our bodies need energy and how we get it. As with all our explorations into the complexity of the human body, when you see the incredible design of the digestive system, you ultimately have to ask yourself, "Can this all possibly be an accident? Something that happened by chance?" The answer is a resounding, "No!" We are not the product of evolution. We are not animals. We are a special creation. In Digestive System & Metabolism, you will learn about: The digestive system—including the teeth and tongue, the mouth and esophagus, the stomach and intestines, the liver, the gallbladder, and the pancreas Our metabolism—a complex system created by God to transform food into fuel for our energy God our Designer thought of everything, even the problems that would occur in a sin-cursed world. We are indeed wonderfully made. Prepare to be amazed!

[Your Amazing Digestion from Mouth through Intestine](#) HarperCollins

Through engaging text, readers learn about the human body's digestive system, which turns the foods you eat into substances your body can use. This book explains how food moves through the digestive system. Readers learn that chewing breaks food into small pieces and helps saliva reach all of the food. The tongue's duties, which are to mix the food with saliva, position the food within the mouth, form food pieces into a bolus, and finally push the bolus to the back of the mouth, are also discussed. Other topics discussed include the pharynx, or throat, the esophagus, the large intestine, and the small intestine, and the pancreas, which releases enzymes, such as amylase and maltase to break down carbohydrates, trypsin to break down proteins, and lipase to break down fats to break down food into its individual nutrients. Readers will learn how extra gas gets into the body, how it escapes, and how to prevent it. Digestive problems, such as indigestion, and ways to keep the digestive system working properly, including a healthy diet with plenty of fiber, are also highlighted. Full-color photos, detailed diagrams, medical models, phonetics, glossary, and index enhance the text.

**The Digestive System** Heinemann Educational Books

Questions and answers explain the human digestive system and how it uses food for nutrition.

[The Science of the Digestive System](#) Learning Matters

"Every munch and crunch of our lunch makes its way through our digestive systems. How does our body break down food into energy? This innovative book gives readers an inside look at this essential bodily process. Flowcharts reiterate key concepts at the end of each chapter, allowing readers to visualize and retain complex information in a fun way. Colorful graphics and easy-to-understand language ensure this book is both fun and accessible. Even readers who are reluctant to study science will enjoy this visually rich, playful exploration of the human digestive system. This unique approach to science curriculum materials is sure to make this book a favorite in any library."

[Digestive System Q&A](#) Classroom Complete Press

Colorful graphics, engaging text, and fun, close-up photographs invite young readers to become familiar with their digestive system. In this book, readers will learn how their mouth, esophagus, stomach, and intestines work together to digest their food and give their body energy. Simple diagrams highlight major parts of the digestive system. Also described are the inner structure of the stomach, the small intestine, and the large intestine as food moves through the body. In addition, readers will learn about nutrition, exercise, and hygiene to keep their digestive system healthy. Features include a table of contents, fun facts, diagrams, health tips, a glossary with phonetics, and an index. Buddy Books is an imprint of ABDO Publishing Group.
