This book

addresses one of

the most persistent issues confronting governments, educations systems and schools today: the attraction, preparation, and retention of early career teachers. It draws on the stories of sixty graduate teachers from Australia to identify the key barriers, interferences and obstacles to teacher resilience and what might be done about it.

Based on these stories, five interrelated themes - policies and practices, school culture, teacher identity, teachers' work, and relationships

provide a framework for dialogue around what kinds of conditions need to be created and sustained in order to promote early career teacher resilience. The book provides a set of resources – stories, discussion, comments, reflective questions and insights from the literature – to promote conversations among stakeholders rather than providing yet another 'how to do' list for improving the daily lives of early career teachers.

Teaching is a complex, fragile and uncertain profession. It operates in an environment of unprecedented educational reforms designed to control, manage and manipulate pedagogical judgements. Teacher resilience must take account of both the context and circumstances of individual schools (especially those in economically disadvantaged communities) and the diversity of backgrounds and talents of early career teachers themselves. The book acknowledges that

the substantial level of change required— cultural, structural, pedagogical and relational – to improve early career teacher resilience demands a great deal of cooperation and support from governments, education systems, schools, universities and communities: teachers cannot do it alone. This book is written to generate conversations amongst early career teachers, teacher colleagues, school leaders, education administrators, academics and

community leaders about the kinds of pedagogical and relational conditions required to promote early career teacher resilience and wellbeing.

"The Federation of Animal Science Societies (FASS) has released the third edition of the Guide for the Care and Use of Agricultural Animals in Research and Teaching (FASS Ag Guide). The first edition was published in 1988, and the first revised edition was published in 1999. The FASS Ag Guide serves as a primary

reference document for meeting the needs and requirements of agricultural animals utilized in research and teaching. This third edition differs from the past editions in several meaningful ways. The full name of the FASS Ag Guide has changed. Previous editions were titled the Guide for the Care and Use of Agricultural Animals in Agricultural Research and Teaching. The new edition drops the second use of the word agricultural in the title.

Chapters have been added to address species handling and transportation and environmental enrichment strategies. The authors of the third edition included experts in each species and in animal care and use, including animal scientists, veterinarians, teachers, and engineers; all were chosen for their prominence in the many fields of the animal sciences so that the best available science could be applied to this revision" -- FASS website.
