Collins Exploring Science Longman Exploring Science Communication demonstrates how science and technology studies approaches can be explicitly integrated into effective, powerful science communication research. Through a range of case studies, from climate change and public parks to Facebook, museums, and

media coverage, it helps you to understand and analyse the complex and diverse ways science and society relate in today's knowledge intensive environments. Notable features include: A focus on showing how to bring academic STS theory into your own science communication research Coverage of a range of topics and case studies illustrating different analyses and approaches Speaks to disciplines across Media & Communication, Science & Technology Studies, Health Sciences, Environmental Sciences and related areas. With this book you will learn how science communication can be more than just about disseminating facts to the public, but actually generative, leading to new understanding, research, and practices.

Exploring Science Communication Primary Explore Science International Edition part of the Heinemann Explore Science New International Edition - a comprehensive, easy-to-use, six-level science programme, designed specially for teachers and students at International

schools studying the Cambridge International Examinations Primary Science Curriculum Framework.

Exploring Science: Brown Book
Introduce students to real science with

Exploring the Building Blocks of Science Book 5 Student Textbook. Foundational scientific concepts and terminology are presented clearly and in a manner that's easy for kids to understand. Using this book gives kids a solid base on which to build a further study of science. This year-long curriculum contains four chapters each of five scientific disciplines: chemistry, biology, physics, geology, and astronomy, as well as an introduction to the material covered and a concluding chapter, for a total of 22 chapters. The many graphics in this full color textbook reinforce the concepts presented and make the book fun for kids and teachers alike to read. This Student Textbook is accompanied by Exploring the Building Blocks of Science Book 5 Laboratory Notebook (experiments) and Exploring the Building Blocks of Science Book 5

Teacher's Manual. Other supplemental materials are available at www.real-science4kids.com.
