FIRST NOVEL. NEBULA AWARD FINALIST.

National Bestseller in trade paperback. An agent for a spy organization uncovers an alien alliance in nearby interstellar space—an alliance that will soon involve humanity in politics and war on a galactic scale. 2105, September: Intelligence Analyst Caine Riordan uncovers a conspiracy on Earth's Moon—a history-changing clandestine

project—and ends up involuntarily cryocelled for his troubles. Twelve years later, Riordan awakens to a changed world. Humanity has achieved faster-than-light travel and is pioneering nearby star systems. And now, Riordan is compelled to become an inadvertent agent of conspiracy himself. Riordan's mission: travel to a newly settled world and investigate whether a primitive local species was once sentient—enough so to have built a lost civilization. However, arriving on site in the Delta Pavonis system, Caine discovers that the job he's been given is anything but secret or safe. With assassins and saboteurs dogging his every step, it's clear that someone doesn't want his mission to succeed. In the end, it takes the broad-based insights of an intelligence analyst and a matching instinct for intrigue to ferret out the truth: that humanity is neither alone in the cosmos nor safe. Earth is revealed to be the lynchpin planet in an impending struggle for interstellar dominance, a struggle into which it is being irresistibly dragged. Discovering new dangers at every turn, Riordan must now convince the powers-that-be that the only way for humanity to survive as a free species is to face the perils directly—and to fight fire with fire.

This book addresses the meanings and implications of multilingualism and its uses in a context of rapid changes, in Europe and around the world. All types of organisations, including the political institutions of the European Union, universities and private-sector companies must rise to the many challenges posed by operating in a multilingual environment. This requires them, in particular, to make the best use of speakers' very diverse linguistic repertoires. The contributions in this volume, which stem from the DYLAN research project financed by the European Commission as part of its Sixth Framework Programme, examine at close range how these repertoires develop, how they change and how actors adapt skilfully the use of their repertoires to different objectives and conditions. These different strategies are also examined in terms of their capacity to ensure efficient and fair communication in a multilingual Europe. Careful observation of actors' multilingual practices reveals finely tuned communicational strategies drawing on a wide range of different languages, including national languages, minority languages and *lingue franche*. Understanding these practices, their meaning and their implications, helps to show in what way and under what conditions they are not merely a response to a problem, but an asset for political institutions, universities and business.
