warnings, Iran has tested a nuclear bomb. But the blast from the device is different and far more dangerous than that of any previous nuclear weapon. Surveillance instruments show that for one split second an event occurred that had not taken place since the Big Bang fourteen billion years ago. Meanwhile, science historian David Swift and

quantum physicist Monique Reynolds learn that their autistic son, Michael, has been kidnapped by a militant cult called the True Believers. Michael, a descendant of Albert Einstein, has inherited Einstein's remarkable intelligence and is the only person in the world who knows Einstein's last secret—the Final Theory, a set of equations that could explain

all the forces of nature. Only those who understand the key to creation could know how to destroy it. The Iranian nuclear blast is a demonstration of this understanding. Soon David and Monique realize their desperate search for Michael is also a desperate race to stop the horrific power of the theory from being unleashed. Joining forces with FBI Agent Lucille Parker, David and

---

Monique race from the Old City of Jerusalem to the deserts of Turkmenistan to rescue Michael and stop the cult 's fanatic leader. Their journey proves just how difficult it is to stop those who are willing to die in the name of God. Praised by bestselling peers such as Douglas Preston and James Rollins, Mark Alpert shows he is at the top of his writing game and the cutting

edge of science, seamlessly weaving fact and fiction with nonstop heart-pounding action in this explosive thriller. We will never see our universe in quite the same way again. Six Sourcebooks, Inc. "This novel isn't just ripped from the headlines, it's an alarm bell ringing from the near-future, a prescient warning of where we're headed next. Read this now--before it's literally too late." - New York Times bestselling author James Rollins

America is on the brink of collapse, devastated by a brutal government trying to silence its citizens, in *The Coming Storm*, the next action-packed thriller from Mark Alpert. New York City, 2023: Rising seas and superstorms have ravaged the land. Food and electricity are scarce. A dangerous Washington regime has terrorized the city, forcing the most vulnerable and defenseless people into the flood-ravaged neighborhoods. The new laws are enforced by an army of genetically enhanced soldiers, designed to be the

---

fiercest and cruelest of killers. Genetic scientist Dr. Jenna Khan knows too much about how these super-soldiers were engineered: by altering the DNA sequence in ways that could change the fabric of humanity. Escaping arrest and on the run, Jenna joins forces with a genetically enhanced soldier gone rogue and a Brooklyn gang kingpin to resist the government's plan to manipulate the DNA of all Americans. The race is on to stop the evil experiment before it spreads the genetic changes...and transforms the

human species forever. *Underground Sourcebooks, Inc.* "Honest and funny, passionate and contrite, meticulously researched and deeply philosophical: an essential document on the '60s." —Washington Post  
Mark Rudd, former '60s radical student leader and onetime fugitive member of the notorious Weather Underground, tells his compelling and engrossing story for the first time in *Underground*. The chairman of the

SDS and leader of the 1968 student uprising at Columbia University, Rudd offers a gripping narrative of his political awakening and fugitive life during one of the most influential periods in modern U.S. history. *LSD, My Problem Child Sourcebooks Fire*  
When a chance encounter with a beautiful woman named Ariel plunges him into the middle of a secret war among the Furies, humans with a rare genetic mutation, John Rogers must stop a conflict in which the grand prize is a chance to remake the human race. 30,000 first printing.

with a cutting-edge digital mind, he is smarter, faster, better than a normal teen. Except Adam is anything but invincible. He's indebted to the government program that gave him this ability- and freedom comes at a price. Adam and his teammates, the six Pioneers, swore to defend humanity against Sigma, the most ruthless artificial intelligence program ever designed. The Pioneers are all that stand between the AI and world domination. But Sigma has an advantage. It has learned about human weakness, and its new weapon? Betrayal. In this war between good and evil, the battle lines have been drawn...but someone is about to switch sides. Nothing is as it seems...  
When Adam joined the Pioneer program, he became one of six teens to forfeit their bodies for a new, digital existence.  
Together, the Six were unstoppable, protecting the world from artificial-

systems that threatened the human race. But they were more than a team—they were family.  
Until now. Adam has a complex power within his circuitry that defies the very laws of physics. He wasn't programmed to have this power, and he can barely control it or its consequences. Adam's never felt more alone. Amber, the newest Pioneer,

---

knows what it is like to be an outsider. She gets him in a way the others don't. Except Amber's software has been corrupted, and until Adam figures out exactly what she's become, the Pioneers—and the world—are in mortal danger. "Questions of principle, power, and possibility keep this look at our modern, hardwired existence fresh and fascinating." Lighthearted, quirky, and upbeat, this book explores the portrayal of science and technology on both the big and little screen -- and how Hollywood is actually doing a better job of getting it right than ever before. Grounded in the real-world, and often cutting-edge, science and technology that inspires fictional science, the authors survey

–Booklist, STARRED review of The Six "An exciting action-story chock full of characters you'll love. The Six is full of big ideas, big questions, real science, and things that will make you think and wonder and lie awake late at night." –Michael Grant, author of the Gone series onThe Six *Final Theory* Springer

---

Hollywood depictions of topics such as quantum mechanics, parallel universes, and alien worlds. Including material from interviews with over two dozen writers, producers, and directors of acclaimed science-themed productions -- as well as scientists, science fiction authors, and science advisors -- Hollyweird Science

examines screen science fiction from the sometimes-conflicting vantage points of storytellers, researchers, and viewers. Including a foreword by Eureka co-creator and executive producer Jaime Paglia, and an afterword by astronomer and science fiction author Michael Brotherton, Ph.D., this book is accessible to all readers

from the layperson to the armchair expert to the professional scientist, and will delight all of them equally. The Language Instinct Macmillan This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to

---

a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever.

Extinction  
Sphere  
In this terrifying tale of humanity's

---

desperate stand against a robot uprising, Daniel H. Wilson has written the most entertaining sci-fi thriller in years. Not far into our future, the dazzling technology that runs our world turns against us. Controlled by a childlike-yet massively powerful artificial intelligence

known as Archos, the global network of machines on which our world has grown dependent suddenly becomes an implacable, deadly foe. At Zero Hour—the moment the robots attack—the human race is almost annihilated, but as its scattered remnants regroup, humanity for the first time unites

in a determined effort to fight back. This is the oral history of that conflict, told by an international cast of survivors who experienced this long and bloody confrontation with the machines. Brilliantly conceived and amazingly detailed, *Robocalypse* is an action-packed epic

---

with chilling implications about the real technology that surrounds us.

Robocalypse

University of Michigan Press

This book offers a clearly written, entertaining and comprehensive source of medical information for both writers and readers of science fiction. Science fiction in print, in movies and on television all

too often presents dubious or simply incorrect depictions of human biology and medical issues. This book explores the real science behind such topics as how our bodies adapt to being in space, the real-life feasibility of common plot elements such as suspended animation and medical nanotechnology, and future prospects for improving health, prolonging our lives, and enhancing our bodies through technology.

Each chapter focuses on a single important science fiction-related subject, combining concise factual information with examples drawn from science fiction in all media. Chapters conclude with a "Bottom Line" section summarizing the most important points discussed in the chapter and giving science fiction writers practical advice on how to incorporate them into their own creations, including a list of references for

---

further reading. The book will appeal to all readers interested in learning about the latest ideas on a variety of science fiction-related medical topics, and offers an invaluable reference source for writers seeking to increase the realism and readability of their works. Henry G. Stratmann, MD, FACC, FACP is a cardiologist with board certifications in internal medicine, cardiology, and nuclear cardiology.

Before entering private practice he became Professor of Medicine at St. Louis University School of Medicine and performed clinical medical research. Henry received a BA in chemistry from St. Louis University and his MD at Southern Illinois University School of Medicine. He is currently enrolled at Missouri State University to obtain a BS in physics with a minor in astronomy. His

professional publications include being an author or coauthor of many research articles for medical journals, primarily in the field of nuclear cardiology. Henry is also a regular contributor of both stories and science fact articles to Analog Science Fiction and Fact. **Entangled Life** Random House Trade Paperbacks Presents fantasy stories written by Internet

When we think  
of fungi, we  
likely think of  
mushrooms. But  
mushrooms are  
only fruiting  
bodies,  
analogous to  
apples on a  
tree. Most  
fungi live out  
of sight, yet  
make up a  
massively  
diverse kingdom  
of organisms  
that supports  
and sustains  
nearly all  
living systems.  
Fungi provide a  
key to  
understanding  
the planet on  
which we live,  
and the ways we  
think, feel,

---

and behave. In *Entangled Life*, the brilliant young biologist Merlin Sheldrake shows us the world from a fungal point of view, providing an exhilarating change of perspective. Sheldrake's vivid exploration takes us from yeast to psychedelics, to the fungi that range for miles underground and are the largest organisms on the planet, to those that link plants together in complex networks known as the "Wood Wide Web," to those that infiltrate and manipulate insect bodies with devastating precision. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life's processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

Glenn Beck's heart-pounding sequel to his #1 bestselling

---

novel The Overton Window The last battle for freedom is under way. An unlikely band of ordinary Americans is ready to make its last stand in defense of self-rule, freedom, and liberty. Among them is Molly Ross, a young rebel who exposed a shadow war for the nation's fate that is waged by aging trillionaire Aaron Doyle and an elite cabal of self-

styled tyrants. Marked as traitors and hunted down, Ross and her allies are cornered and standing alone. But the fight is far from over. As Doyle prepares to fulfill his dark global vision for humanity's future, Molly and her small but devoted team bravely infiltrate one of the most secure locations on Earth—a place holding longstanding

secrets that, if revealed, will forever change the way Americans view their extraordinary place in history. Glenn Beck takes the sizzling suspense and roller-coaster twists of The Overton Window to new heights in this electrifying thriller. The Orion Plan Springer Countdown to Doomsday The year is 2026. The US military has a new weapon

---

in its arsenal: an intelligent life-form so versatile that it can not only create a new generation of weapons but can become a weapon itself—entering a host's body to manipulate (or kill) them. Admiral James Curtiss is tasked with deploying the new weapons, first in Cuba, then Venezuela, then China. But the news of the military's breakthrough

has gotten out and there are menacing forces trying to steal it. What's more, a single man has somehow harnessed the new power and has become something more than human—godlike and seemingly indestructible. He is known only as the Inventor, and he has a warning for humanity: abandon the new technology or the human race will face extinction. It's a

countdown to doomsday. But humanity's final fate may be decided in the most unlikely of places: among the primitive tribes of the Kalahari Desert where a top secret military mission has just taken an unexpected turn.
