Though Raine has little experience with men, Seth's fiercely masculine good looks and animal sensuality stir her most erotic fantasies when she's alone. . . and lead her to a bold plan. you use the proper methods. Piper McCloud can fly. Just like that. Easy as pie. Sure, she hasn't mastered reverse propulsion and her turns are kind of sloppy, but she's real good at loop-the-loops. Problem is, the good folk of Lowland County are afraid of Piper. And her ma's at her wit's end. So it seems only fitting that she leave her parents' farm to attend a top-secret, maximum-security school for kids with exceptional abilities. School is great at first with a bunch of new friends whose skills range from super-strength to super-genius. (Plus all the homemade apple pie she can eat!) But Piper is special, even among the special. And there are consequences. Consequences too dire to talk about. Too crazy to consider. And too dangerous to ignore. At turns exhilarating and terrifying, Victoria Forester's debut novel has been praised by Stephenie Meyer, author of the Twilight saga, as "the oddest/sweetest mix of Little

House on the Prairie and X-Men...Prepare to have your heart warmed." The Girl Who Could Fly is an unforgettable story of defiance and courage about an irrepressible heroine who can, who will, who must . . . fly. This title has Common Core connections. Praise for Victoria Forester and The Girl Who Could Fly: "It's the oddest/sweetest mix of Little House on the Prairie and X-Men. I was smiling the whole time (except for the part where I cried). I gave it to my mom, and I'm reading it to my kids—it's absolutely multigenerational. Prepare to have your heart warmed." Stephenie Meyer, author of the Twilight saga "In this terrific debut novel, readers meet Piper McCloud, the late-in-life daughter of farmers...The story soars, just like Piper, with enough loop-de-loops to keep kids uncertain about what will come next....Best of all are the book's strong, lightly wrapped messages about friendship and authenticity and the difference between doing well and doing good."--Booklist, Starred Review "Forester's disparate settings (down-home farm and futuristic ice-bunker institute) are unified by the rock-solid point of view and unpretentious diction... any child who has felt different will take strength from Piper's fight to be herself against the tide of family, church, and society."--The Horn Book Review The Girl Who Could Fly is a 2009 Bank Street - Best Children's Book of the Year. Cowboy Adventures, Yukon & Oregon Trail Tales, Famous Outlaw Classics, Gold Rush Adventures & more (Including Riders of the Purple Sage, The Night Horseman, The Last of the Mohicans, Rimrock Trail...) Brava Restless and impulsive, Bruno Ranieri fits right in with the McClouds. And just like the McCloud brothers, Bruno has a dangerous past to contend with--one that's about to

come crashing back into his life. . . Bruno is working hard to keep his nose clean and save the family business. Not easy when the nightmares that plagued his childhood are hijacking what little rest he gets. Even harder when beautiful fugitive Lily Parr appears, on the run from assassins--and implying that Bruno is involved. But the violence that accompanies her is no illusion. Nor is the blisteringly hot desire that explodes between them. After her father's suspicious death, and an attempt on her own life, snippets of information have led Lily to Bruno's door. . .and his charisma soon compels her into his bed. But with killers on her heels, running won't help--not with the terrifying secret lurking in Bruno and Lily's pasts. A secret their mysterious enemy will gladly destroy them to

Fade To Midnight Oliver-Heber books

Generations have been and gone since Colonel Jeremy McCloud disappeared without trace on the first space mission launched by the United States of America in August 1945. Those involved in the launch are also gone—or have they? Present day, twenty-first century The first indication there might be contact with the 1945 space vessel The Javelin was unknowingly initiated by an archivist, Sophia Aburae, who heard a distinct signal originating somewhere in the archivist ' s expansive workrooms in Washington, DC. On receiving notification of a mysterious signal, US military specialists became involved in detecting its whereabouts and extricating the relay assembly. Unknown operatives were assigned the task of seeking out and destroying those involved in the delicate and secretive operation.

Unknown alien visitors—eight identically dressed beings—were assigned the task of stopping any interference by the United States Military ’ s specialist operation forces. A stranger, Mr. Krawn, apparently of human origin, addressed the United Nations Security Council with a request to allow asylum and safe haven for the inhabitants of an unknown planet, Ichtholia, situated in the Maritimus Galaxy, ten light-years from Earth. A number of alien space vessels from Ichtholia descended onto the plains of the Great Western Desert in Western Australia. Primitive tribesmen of the Pintupi Nation observed the arrival of the strangers, reporting their discovery to a remote police station at Kiwirrkurra. A desert patrol was sent to the location and—along with numerous tribesmen—observed the behavior of the alien visitors to prevent any aggressive actions toward Earth beings. Corruption existed across many nations. Collaboration with the aliens by traitorous Xranons exacerbated the need for friendly alien forces to curb any attempts to overthrow the governments of all

nations and control Earth—the blue planet!

THE OUTLAWS OF THE WILD WEST: 150+ Westerns in One Edition MCD

Climate change is the defining issue of our time - we know, beyond reasonable doubt, what that science now tells us. Just as climate change is accelerating, so too must we - summoning up a greater sense of urgency, courage and shared endeavour than humankind has ever seen before. The Age of Climate Change is an age of superlatives: most extreme this, biggest that, most costly ever. The impacts worsen every year, played out in people's backyards and communities, and more and more people around the world now realise this is going to be a massive challenge for the rest of their lives. In *Hope in Hell*, Porritt confronts that dilemma head on. He believes we have time to do what needs to be done, but only if we move now - and move together. In this ultimately optimistic book, he explores all these reasons to be hopeful: new technology; the power of innovation; the mobilisation of young people - and a sense of intergenerational solidarity as older generations come

to understand their own obligation to secure a safer world for their children and grandchildren.
