eZ Publish (pronounced "easy publish") is an open-source enterprise

PHP content management system that was developed by the Norwegian company Ibexa. eZ Publish is freely available under the GNU GPL version 2 license, as well as under proprietary licenses that include commercial support. In 2015, eZ Systems introduced eZ Platform to replace eZ Publish with a more modern and future-proof solution.

With the help of Capterra, learn about eZ Publish, its features, pricing information, popular comparisons to other Content

Management products and more. Still not sure about eZ Publish? Check out alternatives and read real reviews from real users.

Ibexa - Transformez votre entreprises, passez au digital Introduction. eZ Publish is an infinitely flexible and powerful CMS that powers a wide variety of websites with low or high traffic. This power comes with a price: resource consumption in general, and SQL resource consumption in particular, as well as disk I/O !All these mechanisms

have to be controlled to size its architecture, or understand the impact of a parameter, of a cache-block ...

eZ Publish / Documentation - Doc

5.X. With the introduction of 5.x in 2012, eZ Publish made an important leap forwards in terms of technology, introducing a new architecture side by side with the 4.x based "Legacy", allowing user to gradually migrate towards what by 2015 was set to become the 6th generation eZ CMS: eZ Platform.
