Discover the practical aspects of implementing deep-learning solutions using the rich Python ecosystem. This book bridges the gap between the academic state-of-the-art and the industry state-of-the-practice by introducing you to deep learning frameworks such as Keras, Theano, and Caffe. The practicalities of these frameworks is often acquired by practitioners by reading source code, manuals, and posting questions on community forums, which tends to be a slow and a painful process. *Deep Learning with Python* allows you to ramp up to such practical know-how in a short period of time and focus more on the domain, models, and algorithms. This book briefly covers the mathematical prerequisites and fundamentals of deep learning, making this book a good starting point for software developers who want to get started in deep learning. A brief survey of deep learning architectures is also included. *Deep Learning with Python* also introduces you to key concepts of automatic differentiation and GPU computation which, while not central to deep learning, are critical when it comes to conducting large scale experiments. *What You Will Learn* Leverage deep learning frameworks in

Python namely, Keras, Theano, and Caffe Gain the fundamentals of deep learning with mathematical prerequisites Discover the practical considerations of large scale experiments Take deep learning models to production Who This Book Is For Software developers who want to try out deep learning as a practical solution to a particular problem. A rotorcraft is a class of aircraft that uses large-diameter rotating wings to accomplish efficient vertical take-off and landing. The class encompasses helicopters of numerous configurations (single main rotor and tail rotor, tandem rotors, coaxial rotors), tilting proprotor aircraft, compound helicopters, and many other innovative configuration concepts. *Aeromechanics* covers much of what the rotorcraft engineer needs: performance, loads, vibration, stability, flight dynamics, and noise. These topics include many of the key performance attributes and the often-encountered problems in rotorcraft designs. This comprehensive book presents, in depth, what engineers need to know about

modelling rotorcraft aeromechanics. The focus is on analysis, and calculated results are presented to illustrate analysis characteristics and rotor behaviour. The first third of the book is an introduction to rotorcraft aerodynamics, blade motion, and performance. The remainder of the book covers advanced topics in rotary wing aerodynamics and dynamics.

A dual language edition in English and French. The genocide in Rwanda shocked the world. Back then, Ery Nzaramba was only a teenager and his family 's escape to Europe turned him into a " survivor " . How should he now respond to questions about who he is and where he comes from? In this autobiographical one-man

---

play, performed to acclaim on the Edinburgh Festival Fringe, the author journeys back to his Rwandan childhood. With the help of a cassette player, he brings to life nearly a dozen characters, exploring memories of kinship, cultural attitudes and personal identity. Both funny and poignant, the play highlights not only the intolerance that can breed violence and war but also the importance of power and privilege in the struggle for survival. Le g é nocide au Rwanda a choqu é le monde. À l' é poque, Ery Nzaramba é tait un adolescent. Apr è s que sa famille se fut é chapp é en Europe, il est devenu un « survivant » . D é sormais, que doit-il r é pondre à des questions sur qui il est et d'o ù il vient? Dans ce one-man show autobiographique, salu é par la critique lors de sa pr é sentation au Festival d' É dimbourg, l'auteur retourne vers son enfance au Rwanda. Accompagn é d'un lecteur cassette, il donne vie à une bonne douzaine de personnages, explorant souvenirs de famille et d'affinit é s, attitudes culturelles et identit é . À la fois poignante et pleine d'humour, la pi è ce met en lumi è re non seulement l'intol é rance qui peut engendrer violence et guerre, mais aussi l'importance du privil è ge dans la lutte pour la survie. ERY NZARAMBA Ery Nzaramba left Rwanda to settle in Belgium in 1994. Ten years later he moved to the UK for an acting career. In 2014 Ery started working with director Peter Brook and long-time collaborator Marie-H é l è ne Estienne, featuring in world tours of Battlefield and The Suit. Ery has been awarded two Grants for the Arts by Arts Council England and an Arvon Grant for his writing. He has written and directed short films; Split/Mixed is his first piece written for theatre. He wrote the first draft in 2013 and was invited to perform it in New York, Berlin, and Belfast. The play continued to be developed and its current version premiered to critical acclaim at the Edinburgh Fringe Festival in 2016. "Every time someone asks where I ' m from, it ' s a reminder of how lucky and privileged I ' ve been. In 1994 Rwanda was in the news for all the wrong reasons. It was being torn apart by a civil war and a genocide. Unlike millions of others who couldn ' t, my family escaped. Because we could. And we got all the support in the world because we were "refugees". But were we, really? Would I be able to look in the eye of one of the other millions of Rwandans who couldn ' t leave the country and say "I ' m a refugee"? I've lived in Europe for nearly a quarter of a century now, and though I ' m no longer a refugee, that question has continued to haunt me. So I decided to write Split/Mixed." Praise for his work: "Hilarious, harrowing and acutely moving...[An] essential, coruscating work" – \*\*\*\* The Stage "An extraordinary one-man play (...) Split/Mixed is deeply moving, even harrowing at times. But it is also extremely funny... – www.wordswithjam.co.uk
