[What was the horsepower and torque of the Saturn V rocket ...](#)

The F-1 engine had roots outside NASA, born as an Air Force program developed by the aerospace firm Rocketdyne in 1955. NASA inherited it during a transfer of projects, conducted its own feasibility studies and awarded Rocketdyne a follow-on contract to step up work on the gargantuan propulsion system not long after NASA's formation, in 1960.

Hobbylinc carries 26 f model rocket engines at discounts up to 21%. The most popular f model rocket engines brands include Estes Rockets, and Aerotech.

F1 Engine Rocket

The F-1 engine remains the highest thrust rocket engine that NASA has ever flown (1.5 million pounds of thrust). The liquid-fueled engine was used during the Apollo program and sat at the bottom of the Saturn V. The engines were designed to be disposable. After reaching a certain altitude, the engines would shut down and fall back into the ocean.

[E, F & G \(29mm\) Engines - Estes Rockets](#)

Though the F-1 was the largest and most powerful single-chamber liquid-fueled rocket engine ever successfully flown, its power was exceeded by a pair of Soviet designs.

[F-1 Rocket Engine - National Air and Space Museum](#)

The new F-1 is very near the model of its host, the Apollo/Saturn V Rocket. There were five Rocketdyne F-1s used to power the Boeing's S1-C first stage and push the entire load of the Moon rocket off the pad.
