Accounting Principles and Practice  
describes the principles and

conventions which provide the  
structure of Accounting practice.  
Many of the questions are taken  
from the past examinations of the  
Royal Society of Arts, the  
Association of Certified and  
Corporate Accountants, the Society  
of Incorporated Accountants, and  
the Institute of Chartered  
Accountants. This book is divided  
into 19 chapters and begins with a  
brief introduction to the double  
entry system of accounting.  
Considerable chapters are devoted  
to the Accounting techniques  
concerning the management of  
different types of accounts,  
receipts, payments, and  
expenditures. Other chapters  
examine the validity of the  
principles involved and of the  
limitations of the conventions. This  
text is based upon the conviction  
that the oft-quoted distinction  
between theory and practice is  
disastrously misleading. It  
demonstrates that good theory and  
good practice are inseparable. This

book will prove useful to accountants and accounting students.

Fundamental Accounting Principles  
Irwin/McGraw-Hill

This text discusses and presents accounting principles and concepts in lay man's terms using simple day-to-day terminologies. Definitions are always amplified by examples familiar to students. The steps in the accounting process are discussed using the same illustration problems from chapter to chapter so that the student can connect the relationship of the steps in the accounting process. Being a basic accounting textbook, the book will provide students with a solid and strong basic accounting knowledge to better equip them to tackle more advanced accounting courses. Accounting, as a field of study is profressive; accounting knowledge is learned in stages; what is learned in basic accounting is used and applied in more advanced accounting courses. Consequently, if a student has a weak basic accounting foundation, he will have difficulty succeeding in more advanced accounting courses.
