The Quick-Reference Guide to Addictions and Recovery Counseling John Wiley & Sons
Twitter, Facebook, blogging, chat rooms, email, the internet and beyond - for most parents, teachers and youth workers, getting to grips with new technology is a bit of a challenge. But keeping children safe is a much bigger one. As technology changes, and young people grasp it faster than the older generations do, it can be a real struggle to know what to do to help, equip and defend. Dr Bex Lewis is an expert in new technology. She knows how it works, what to do and where to go for the latest information. It is rarely possible to keep young people away from new technology, nor is it wise. This book will enable parents, teachers and youth workers to give young people the equipment they need to get the best out of new technology and to avoid the dangers. Qualitative Research in Education: A User's Guide A User's Guide SAGE

Cyber Risks, Social Media and Insurance: A Guide to Risk Assessment and Management Elsevier

The newest addition to the popular Quick-Reference Guide collection, The Quick-Reference Guide to Addictions and Recovery Counseling focuses on the widespread problem of addictions of all kinds. It is an A-Z guide for assisting pastors, professional counselors, and everyday believers to easily access a full array of information to aid them in formal and informal counseling situations. Each of the forty topics covered follows a helpful eight-part outline and identifies (1) typical symptoms and patterns, (2) definitions and key thoughts, (3) questions to ask, (4) directions for the conversation, (5) action steps, (6) biblical insights, (7) prayer starters, and (8)

recommended resources.

This book discusses how Big Data could be implemented in educational settings and research, using empirical data and suggesting both best practices and areas in which to invest future research and development. It also explores: 1) the use of learning analytics to improve learning and teaching; 2) the opportunities and challenges of learning analytics in education. As Big Data becomes a common part of the fabric of our world, education and research are challenged to use this data to improve educational and research systems, and also are tasked with teaching coming generations to deal with Big Data both effectively and ethically. The Big Data era is changing the data landscape for statistical analysis, the ways in which data is captured and presented, and the necessary level of statistical literacy to analyse and interpret data for future decision making. The advent of Big Data accentuates the need to enable citizens to develop statistical skills, thinking and reasoning needed for representing, integrating and exploring complex information. This book offers guidance to researchers who are seeking suitable topics to explore. It presents research into the skills needed by data practitioners (data analysts, data managers, statisticians, and data consumers, academics), and provides insights into the statistical skills, thinking and reasoning needed by educators and researchers in the future to work with Big Data. This book serves as a concise reference for policymakers, who must make critical decisions regarding funding and applications.

Palgrave Macmillan

Algorithms are the hidden methods that computers apply to process information and make decisions. Nowadays, our lives are run by algorithms. They determine what news we see. They influence which products we buy. They suggest our

dating partners. They may even be determining the outcome of national elections. They are creating, and destroying, entire industries. Despite mounting concerns, few know what algorithms are, how they work, or who created them. Poems that Solve Puzzles tells the story of algorithms from their ancient origins to the present day and beyond. The book introduces readers to the inventors and inspirational events behind the genesis of the world's most important algorithms. Professor Chris Bleakley recounts tales of ancient lost inscriptions, Victorian steam-driven contraptions, top secret military projects, penniless academics, hippy dreamers, tech billionaires, superhuman artificial intelligences, cryptocurrencies, and quantum computing. Along the way, the book explains, with the aid of clear examples and illustrations, how the most influential algorithms work. Compelling and impactful, Poems that Solve Puzzles tells the story of how algorithms came to revolutionise our world.

Poems That Solve Puzzles Routledge
Effective risk communication is essential to the well-being of any organization and those people who depend on it. Ineffective communication can cost lives, money and reputations. Communicating Risks and Benefits: An Evidence-Based User's Guide provides the scientific foundations for effective communications. The book authoritatively summarizes the relevant research, draws out its implications for communication design, and provides practical ways to evaluate and improve communications for any decision involving risks and benefits. Topics include the communication of quantitative information and warnings, the roles of emotion and the news media, the effects of age and literacy, and tests of how well communications meet the organization's goals. The guide will help users in any organization, with

any budget, to make the science of their communications as sound as the science that they are communicating. Computer Systems Experiences of Users with and Without Disabilities CreateSpace This book provides the necessary tools for the evaluation of the interaction between the user who is disabled and the computer system that was designed to assist that person. The book creates an evaluation process that is able to assess the user's satisfaction with a developed system. Presenting a new theoretical perspective in the human computer interaction evaluation of disabled persons, it takes into account all of the individuals involved in the evaluation process.

How to Reinvent and Market Your Business Using Video John Wiley & Sons

While some e-government projects fail to deliver the expected benefits due to numerous technical, organizational, institutional, and contextual factors, information technology continues to be utilized by international governments to achieve countless benefits. E-Government Success around the World: Cases, Empirical Studies, and Practical Recommendations presents the latest findings in the area of e-government success. Written for academics and professionals, this book aims to improve the understanding of e-government success factors and cultural contexts in the field of governmental information technologies in various disciplines such as political science, public administration, information and communication sciences, and sociology.

Big Data in Education: Pedagogy and Research Bloomsbury Publishing

This book explores how the social and technical integration of mainstream social media into gay men's digital cultures since the mid 2000s has played out in the lives of young gay men, looking at how these convergences have influenced more recent iterations of gay men's digital culture. Focusing on platforms such as Gaydar, Facebook, Grindr and Instagram, Cassidy highlights the ways that identity and privacy management issues experienced in this context have helped to generate a culture of participatory reluctance within gay men's digital environments.

Wellbeing: A Complete Reference Guide, Interventions and Policies to Enhance Wellbeing Qualitative Research in Education: A User's Guide A User's Guide This timely book inspires researchers to deploy relevant, effective, innovative

digital methods. It explores the relationship of such methods to 'mainstream' social science; interdisciplinarity; innovations in digital research tools; the opportunities (and challenges) of digital methods in researching social life; and digital research ethics.

The Librarian's Nitty-Gritty Guide to Social Media IGI Global

Using an evidence-based approach and case studies from a wide range of life domains, Interventions and Policies to Enhance Wellbeing examines the most successful existing strategies to promote wellbeing and mental health. Advances in Artificial Intelligence MDPI The Internet is changing. Once a text based medium, it's now transitioning into a video based one. Simply put, marketing to your customers online using traditional techniques no longer works. Why video? It has the power to engage your customers and prompt a response. It can increase the time they stay on your site, influence what they buy, and feed their desire to trust you. This book will teach you how to properly utilize video to help bring your product to life and increase your conversions. Online video expert, John Cecil, provides a guide to successfully incorporating video into your marketing strategy and explains why it's essential in today's market. With the constant flow of information on the Internet, it's vital that you attain the complete attention of your consumer, and video can make this happen. It's been proven that online video will help turn web site visitors into buyers, increasing success and profits. This book details how video technology can be useful to you and outlines tools that can create online visibility and sustainability. Cecil provides techniques for producing and distributing video, maintaining a strategic online video marketing plan, and ultimately creating a greater return on your video investment. The author's approach to video marketing has already been successful for companies such as Canon, eHarmony, Capitol Records, and Experian. Video marketing needs to be a critical piece of a successful online strategy, and this book will teach you not only how to get started, but how your video project can pay for itself with increased ROI. WATCH John Cecil's suite of videos, where he provides key content on ways to incorporate video into your online marketing efforts, best practices for video delivery, and other tips and tricks:

An Evaluation Guide for Professionals ABC-CLIO

This fourth edition continues to provide a link between occupational health and clinical practice. It covers target organ systems that can be affected by hazardous exposures in workplaces, and it focuses on the clinical presentations, investigations and management of affected individuals. We have retained consideration of some special issues relevant to occupational medicine practice in this new edition. The main emphasis continues to be

prevention of disease and early detection of health effects. This edition of the book has been updated to include new materials, topics, and references. We have retained a few of the previous case studies and illustrations, and introduced several new ones. There are new chapters on audit and evidence-based practice and on occupational cancer. We trust that this edition addresses many of the recommendations that were provided by readers of the previous edition. We have again asked international experts to author many of the chapters. Some of the authors are from Asia, and others from the US, UK, the Middle East and Australia. All the authors will have either clinical or academic experience in occupational medicine practice. The book will be of interest to medical practitioners, especially those in primary care and doctors intending to pursue a career in occupational medicine. It would also be relevant for non-medical health and safety professionals wanting to know more about health effects resulting from occupational exposures. Other groups who may find this edition useful as a ready reference are medical students, occupational health nurses, or clinical specialists in fields such as dermatology, respiratory medicine or toxicology. The book is targeted at all those who are interested in the interaction between work and health, and how occupational diseases and work-related disorders may present.

Contents: Clinical Occupational Medicine: Work and Health (David Koh and Aw Tar Ching) Diagnosis and Management of Occupational Diseases (Aw Tar Ching, David Koh and John P Thompson) Respiratory Disorders (David Fishwick and Chris Barber) Skin Disorders (David Koh and Goh Chee Leok) Mental Health Disorders (Ken Addley and Robert Kerr) Musculoskeletal Disorders (Keith Palmer, Jane Frølund Thomsen and Sigurd Mikkelsen) Auditory Disorders (Ailin Razali and Krishna Gopal Rampal) Hematological Disorders (Ng Wee Tong and Mark Newson-Smith) Neurological Disorders (Ian Brown and Arjune Sen) Occupational

Infections (Rayhan Hashmey and Aw Tar Ching) Renal Disorders (Huw Rees, Doris T Chan and Steve Riley) Cardiovascular Disorders (Mikhail S Dzeshka, Eduard Shantsila and Gregory Y H Lip) Hepatobiliary and Gastrointestinal Disorders (Ian Brown and Jane Collier) Eye Injuries and Other Disorders (Laurence Lim Shen and Wong Tien Yin) Metabolic Disorders (Tng Eng Loon and Lee See Muah) Reproductive Disorders (Lim John Wah and David Koh) Occupational Cancers (Lin Fritschi and Alison Reid) Special Issues in Occupational Medicine: Ethics in Occupational Medicine (David Koh and Lee See Muah) Occupational Medicine Practice and the Law (Lee See Muah and David Koh) Audit and Evidence-Based Occupational Medicine Practice (Yue-liang Leon Guo) Health Screening and Periodic Medical Examinations (Aw Tar Ching and David Koh) Aviation Medicine (Brian See and Gan Wee Hoe) Diving Medicine (Gregory Chan Chung Tsing) Remote Health Care (John Nelson Norman) Medical Disasters Planning and Response (Halim Mohamed and Abu Hasan Samad) Communication in Occupational Medicine (Max Lum) Cultural Aspects of Occupational Medicine Practice (Adul Bandhukul) Workers' Compensation Schemes (Paul Cullinan) Rehabilitation and Return to Work (Nerys Williams) Prevention of Occupational Diseases (David Koh and Aw Tar Ching) Readership: Serves as a useful guide for all those who are interested in occupational medical practice. These include medical students at various levels, occupational health nurses, general practitioners, researchers or colleagues and professionals in occupational and public health and safety — in other words, for all who have committed themselves to do the best practice for the health of working people.

A User's Guide Simon and Schuster Learn to market effectively using social media with the unique emphasis and best practices found only in SOCIAL MEDIA MARKETING: A STRATEGIC

APPROACH, 3E. You learn how to create a strong personal brand that is invaluable at any stage of your career, as you master the social media techniques detailed throughout this popular book. A step-by-step planning model leads you through creating an actual social media marketing plan. You also learn how to incorporate important branding strategies within your organization's overall integrated marketing communication approach. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Computer Science and its Applications IGI Global

Internet use-related addiction problems (e.g., Internet addiction, problem mobile phone use, problem gaming, and social networking) have been defined according to the same core element: the addictive symptomatology presented by individuals who excessively and problematically behave using the technology. Online activity is the most important factor in their lives, causing them the loss of control by stress and difficulties in managing at least one aspect of their daily life, affecting users' wellbeing and health. In 2018, Gaming Disorder was included as a mental disease in the 11th Revision of the International Classification of Diseases by the World Health Organization. In 2013, the American Psychiatric Association requested additional research on Internet Gaming Disorder. The papers contained in this e-Book provide unique and original perspectives on the concept, development, and early detection of the prevention of these health problems. They are diverse in the nature of the problems they deal with, methodologies, populations, cultures, and contain insights and a clear indication of the impact of individual, social, and environmental factors on Internet use-related addiction problems. The e-Book illustrates recent progress in the evolution of research, with great emphasis on gaming and

smartphone problems, signaling areas in which research would be useful, even cross-culturally.
