Problem-based learning online is a burgeoning area, crying out for support in all the disciplines, but particularly health, medicine, education and social care that are already advanced users of problem-based learning in higher education. This book provides highly grounded research based ways for those wanting to change problem-based learning modules and programs from face to face to online approaches, as well as those who have developed e-learning components but who want to adopt problem-based methods. Providing an overview of the current state of problem based learning online, it examines why we're moving from fact to face to online provision, considers existing forms of provision, outlines common mistakes and strategies to avoid future problems, and shows how to effectively facilitate learning. Illustrated by mini case studies and examples of international projects, it provides guidance on effective design, online collaboration and group dynamics, and explores the common, and complex, decisions faced when choosing which form of problem-based learning to adopt. Including practical information and resources for games and activities, scenarios of problem-based learning in the different disciplines, advice for supporting staff and students, and effectively evaluating the tools, skills and pedagogy needed for learning, this book is an essential guide for all practitioners involved in the design and delivery of problem based learning online.

Participatory Workshops Routledge
Facilitators exist wherever learning happens. Anyone who works in a community organization, a corporation, a government, or a healthcare environment can end up leading a workshop, running a course, or otherwise facilitating others’ learning. Facilitators can also be consultants or post-secondary instructors who have been hired to lead one course or more. However, many people haven’t been trained in how to facilitate learning effectively. Design to Engage is a “howto” book that will help you become an effective designer and facilitator of learning events. You will: – learn about facilitation roles and responsibilities – discover what good learning experiences look like – plan for and design effective learning events using practical, straightforward design strategies – raise your awareness about how to create inclusive, comfortable environments. Along with specific recommendations on developing the skills and strategies necessary to be an effective facilitator, you’ll find priceless advice on creating participatory
activities to keep learners involved, assessing participants’ learning, gathering feedback about learning experiences, and how to grow your facilitation practice. The more engaging and interactive you make your learning events, the more people will actually learn from them. Practical, accessible, and jam-packed with tools to support facilitators to create impactful learning experiences, Design to Engage is a revelation and an inspiration.

These Are Our Bodies
Church Publishing, Inc.
Evaluating Communication for Development presents a comprehensive framework for evaluating communication for development (C4D). This framework combines the latest thinking from a number of fields in new ways. It critiques dominant instrumental, accountability-based approaches to development and evaluation and offers an alternative holistic, participatory, mixed methods approach based on systems and complexity thinking and other key concepts. It maintains a focus on power, gender, and other differences and social norms. The authors have designed the framework as a way to focus on achieving sustainable social change and to continually improve and develop C4D initiatives. The benefits and rigor of this approach are supported by examples and case studies from a number of action research and evaluation capacity development projects undertaken by the authors over the past fifteen years. Building on current arguments within the fields of C4D and development, the authors reinforce the case for effective communication being a central and vital component of participatory forms of development, something that needs to be appreciated by decision makers. They also consider ways of increasing the effectiveness of evaluation capacity development from grassroots to management level in the development context, an issue of growing importance to improving the quality, effectiveness and utilization of monitoring and evaluation studies in this field. The book includes an introduction to the key approaches and methodologies that are considered effective for planning evaluation, assessing the outcomes of C4D, and engaging in continuous learning. This rigorous book is of immense theoretical and practical value to students, scholars, and professionals researching or working in development, communication and media, applied anthropology, and evaluation and program planning.

Respect for persons, beneficence, and justice are the principles that collectively form the ethical basis of human research. These three principles find expression in Community-Based Participatory Research for Improved Mental Healthcare, or CBPR—a systematic approach for engaging specially defined groups of people in a process of inquiry and social change. In the Community-Based Participatory Research, a panel of renowned authors provide a step-by-step approach for conducting CBPR, providing all the conceptual and methodological guidelines needed to implement this important and extremely fruitful research approach. As early career investigators use this mode of collaborative inquiry in the service of society, an exciting and entirely new capacity for ethically sound and more rigorous and consequential science can be built. An indispensable resource that will be of great interest to researchers from a wide array of disciplines, the Community-Based Participatory Research for Improved Mental Healthcare is a major addition to the literature and certain to become the gold standard reference in the field.
