Falling Harlequin
Freshly mated Omega
Cyra and her four
Alphas are being
hunted, by Cyra ' s
parents, the media and

the police... At the yearly Night Gala, an exclusive event for rich shifters, four Alphas catch Cyra ' s Omega scent and react to her instinctively, recognising her as their mate. They don ' t know what to make of it at first, but as the party is not a place to talk privately, especially not with so much paparazzi around, they decide to sneak off and find a better place to figure out what ' s happening.

Cyra, a rare Omega phoenix, has been hiding herself from the shifter world for years because she wants to live her own life and not be constantly controlled by an Alpha. As soon as an Alpha mates an Omega, the Omega becomes that Alpha ' s property and Cyra refuses to live like that. More importantly, when an Alpha reacts to an Omega ' s scent in an instinctive way, it means that they ' re

fated mates and belong together. Or, well, that ' s how it works normally, when you ' re not a rare shifter type and your parents aren ' t crazy rich... According to the law, there ' s one thing more important than an Alpha marking their fated Omega and that is if the Omega is already promised to a different Alpha by the Omega ' s parents. Marking and mating a promised Omega is illegal and punished

harshly. After Cyra and her four Alphas, hydra Zack, griffin Spence, cerberus Max and centaur Liam, have been spotted sneaking away from the Night Gala, their pictures are plastered all over the shifter gossip media. And, out of nowhere, Cyra ' s parents show up, claiming that Cyra has been missing for years and that the four Alphas have kidnapped her. Even worse, Cyra ' s parents claim that they had already chosen an Alpha for Cyra, that she has been promised to someone for years, even if Cyra didn ' t know about it. Of course, Cyra and her four Alphas only find out about the promised Alpha after Cyra has gone into heat and the four have already mated her, marked her as theirs. They never kidnapped Cyra, no matter what Cyra ' s parents are claiming in the media, but they are now breaking a much more serious law, the law of illegally mating a promised Omega. If they ' re found out, they could end up in jail, or worse, dead, leaving Cyra vulnerable to whatever insidious plans her parents have for her and the four Alphas can ' t let that happen. Which is why Cyra and her fated Alphas are now on the run from Cyra ' s parents, the drama hungry media, who are

exploiting this situation to the fullest, and the police... This is the second book in the Her Shifter Harem ' s Babies series, a paranormal Omegaverse reverse harem #WhyChoose story. This book may include any of these elements: steamy scenes, ' I need tissues NOW ' moments, cries of ' why, oh, why ' and cliffhangers that make you bite your nails (and curse the author).

This story includes

MF and MM scenes.

Sky Davis is fed up of boyfriend Grant taking her for granted, and when she comes home to

find him wearing a girl, Sky suspects the relationship is over. She takes an unscheduled holiday and leaves the life (and guy) she hates behind. Rock star Dylan Morgan is struggling with fame and infamy, sick of his life being controlled by other people. Dylan cuts his hair and walks away from his role as lead singer of Blue Phoenix, leaving behind chaos and speculation. Outside the English seaside town of Broadbeach, their cars and worlds collide. Sky

decides Dylan is an arrogant guy with too many tattoos, and Dylan is amused by the smart-mouthed girl with no idea who he is. Dylan and Sky soon discover they've travelled to Broadbeach for the same reason - to escape from reality and head back to a place with happy childhood memories. Losing themselves in a world where they know nothing about each other, Sky and Dylan begin a summer romance that soon heats up their rainy English summer. Fantasies can't last forever, and when reality crashes the party, Sky isn't sure she wants to be more than his 'summer Sky' but Dylan doesn't want to let her go. Returning to the real world, public scrutiny isn't their only problem. Blue Phoenix lead guitar player, Jem Jones, has a reason for wanting Sky out of Dylan's life, and is determined to come between them. Delia never thought her love of adventure and artifact hunting would lead her to discover such oddities as man-slaying monsters, magical swords, and elves on motorcycles. Oh, and there's also the Ancient Spartan warrior who's been stranded in the

present—he's offering to work as her bodyguard in exchange for English lessons. She's barely wrapped her mind around these strange new developments when another monster arrives, this time in Sedona, Arizona. The tourist town is known for its majestic rock formations, "healing vortexes," and ruins left by the Sinagua, a native people who mysteriously disappeared hundreds

This is the first
paperback edition of a
classic anthology of
Chinese poetry.
Spanning two thousand
years—from the Book of
Songs (circa 600 B.C.)
to the chū form of the
Yuan Dynasty
(1260-1368)—these 150
poems cover all major
genres that students
of Chinese poetry must

learn. Newly designed,
the unique format of
this volume will
enhance its reputation
as the definitive
introduction to Chinese
poetry, while its
introductory essay on
issues of Chinese
aesthetics will
continue to be an
essential text on the
problems of translating
such works into
English. Each poem is
printed with the
original Chinese
characters in
calligraphic form,
coordinated with word-
for-word annotations,

and followed by an English translation. Correcting more than a century of distortion of the classical Chinese by translators unconcerned with the intricacies and aesthetics of the Chinese language, these masterful translations by Wai-lim Yip, a noted and honored translator and scholar, allow English readers to enter more easily into the dynamic of the original poems. Each section of the volume is introduced by a short essay on the mode

or genre of poem about to be presented and is followed by a comprehensive bibliography.

The world has been brought to its knees in recent years due to an increased amount of hurricanes, tsunamis and earthquakes which collectively have left tens of millions without power and derailed economic growth in the

process. However, today weather is not the only threat to massive power loss. It's time to fight back before energy weaknesses and instabilities from disruptive weather patterns cause financial chaos around the world through cyberwarfare. In Lessons from Frankenstorm, you'll learn how to fight back.

Overview: A look back at recent events (Fukushima, India blackout, Sandy here in the U.S., August 2003 blackout in Northeast U.S., etc.). Set up the case that something needs to be done, especially with warming temperatures (2012 was the hottest year on record). What are threats? Focus here is on

weather (temperatures, rising tides, global warming, dwindling water supplies which impact certain energy sources (i.e. fracking, biofuels), terrorism (cyberterrorism which may create a whole new investing sector in the very near future). What can governments and utilities do? It could be good to focus on disaster	recovery efforts, crisis management, legislation, planning and strategy AHEAD of next major storm or terrorist threats that could rattle global financial marketplaces. New legislation could lead to new asset allocation by investors, technology companies, utilities and private equity. Legislation (i.e.	endorsing modern nuclear power, offshore wind, etc.) may also cause new alliances, joint ventures as a result. Could Frankenstorm be used as a global blueprint for energy innovation? Here focus on efforts seen in New York and New Jersey emerging from the darkness and ruin left by Superstorm Sandy through the

real next generation only challenges energy technologies our credibility as a superpower in a new world economy but investors may want to focus on for the next decade (i.e. thorium nuclear reactors which China just announced they are moving toward—should the U.S. follow?). Complacency is not the answer. Doing nothing and simply waiting for another major power outage that not prices).

CLOCKWORK PHOENIX is
the most experimental
and often the most
interesting of the
impressive stable of
four anthologies
published by
Norilana. The second
outing has a lot of
strong work,
including a nice

ultra-romantic tale of a woman of glass by Tanith Lee ("The Pain of Glass"), a moving fairly traditional ghost story from Kelly Barnhill ("Open the Door and the Light Pours Through"), and a story I frankly didn't think I'd like, but which seduced me, Gemma Files and Stephen J. Barringer's "each thing i show you is a piece of my death," about experimental film makers creating a sort of collage film, including what seems a very old clip of a man committing suicide. It's queasy-making, odd, yet compelling. My favorite story is Ann Leckie's "The Endangered Camp," which she says resulted from a sort of challenge to combine dinosaurs, post-apocalyptic fiction, and Mars – and does so beautifully as the crew of the first spaceship to Mars witnesses the asteroid striking Earth and wonders what to do. – Locus
