Students for a Democratic Society Macmillan

Imagine Orange is the New Black for teenagers, or Beyond Scared Straight without the cameras present. Zack Bonnie, author of *Dead, Insane, or in Jail: A CEDU Memoir*, is a product of CEDU Educational Services, having attended Rocky Mountain Academy in Northern Idaho. Using rapid-fire dialog, and quick pacing, he describes his experience as a young teenager at a so-called therapeutic boarding school.

In this, his first book, Mr. Bonnie illuminates issues within the troubled teen industry, including mind control, brainwashing, and verbal abuse. This book is for all audiences, and specifically for readers interested in the reform and regulation of facilities that confine and abuse teenagers under the guise of tough love. The author hopes with his writing and public advocacy to help the many teens and their families who are still under the sway of inept, unscrupulous, and grasping organizations that dupe parents and evade regulation. Zack Bonnie's mission is to raise awareness and highlight the ongoing rights violations and unethical disciplinary actions used around the world by these programs and schools, "so that no teenager will

have to experience what I did."

for fans of Snow Like Ashes, These Broken Stars, or Magonia. Sera Lighthaven has always felt as if she didn't quite belong among her people, the Cerulean, who live in the City Above the Sky. She is curious about every thing—especially the planet that her City is magically tethered to—and can't stop questioning things. Sera has always longed for the day when the tether will finally break and the Cerulean can move to a new planet. But when Sera is chosen as the sacrifice to

break the tether, she feels betrayed by everything in which she'd been taught to trust. In order to save her City, Sera must end her own life. But something goes wrong, and Sera survives, ending up on the planet below in a country called Kaolin. Sera has heard tales about the dangerous humans who live here, and she quickly learns that these dangers were not just stories. Meanwhile, back in the City, all is not what it seems, and the life of every Cerulean may be in danger if Sera is not able to

The 10th! instalment in this infinitely enjoyable series finds the ever-charming, ever-resourceful Mma Ramostwe helping people, and vans, with problems in their lives. Mma Ramotswe's tiny white van has developed a disturbing noise. But having made numerous repairs to the van over the years, Mr J.L.B. Matekoni - her estimable husband and mechanic nonpareil - sells it without telling her and presents her with a new, characterless vehicle. So Mma Ramotswe sets out to recover the van. . . . In the meantime, the thoroughly unpleasant, yet glamorous, Violet Sephotho (who earned 50 percent, at most!,

in the final examinations of the Botswana Secretarial College) gets herself a job at the Double Comfort Furniture Store. Why? The reason is obvious: to make a play for Mma Makutsi's fiancé, Mr Phuti Radiphuti. And a proprietor of a local football team has enlisted the No. 1 Ladies' Detective Agency to help explain their dreadful losing streak: surely someone is fixing the games - it can't just be a case of unskilled players . . . This is a job for Charlie, ever-apprentice at the Speedy Motors, to sniff out the competence of the players, as an assistant detective. . .

Science Books For
centuries, we've toyed
with our creature
companions, breeding
dogs that herd and
hunt, housecats that
look like tigers, and
teacup pigs that fit
snugly in our
handbags. But what
happens when we take
animal alteration a
step further,
engineering a cat that
glows green under
ultraviolet light or
cloning the beloved
family Labrador?
Science has given us a
whole new toolbox for
tinkering with life.
How are we using it?
In Frankenstein's Cat,

the journalist Emily
Anthes takes us from
petri dish to pet
store as she explores
how biotechnology is
shaping the future of
our furry and
feathered friends. As
she ventures from
bucolic barnyards to a
"frozen zoo" where
scientists are storing
DNA from the planet's
most exotic creatures,
she discovers how we
can use cloning to
protect endangered
species, craft
prosthetics to save
injured animals, and
employ genetic
engineering to supply
farms with disease-
resistant livestock.
Along the way, we meet
some of the animals
that are ushering in
this astonishing age
of enhancement,
including sensor-
wearing seals, cyborg
beetles, a bionic
bulldog, and the

world's first cloned cat. Through her encounters with scientists, conservationists, ethicists, and entrepreneurs, Anthes reveals that while some of our interventions may be trivial (behold: the GloFish), others could improve the lives of many species-including our own. So what does biotechnology really mean for the world's wild things? And what do our brave new beasts tell us about ourselves? With keen insight and her trademark spunk, Anthes highlights both the peril and the promise of our scientific superpowers, taking us on an adventure into a world where our grandest science fiction fantasies are fast becoming reality.

for tomorrow, it's hard for a robot to make his way. It's even harder for a robot named Mack Megaton, a hulking machine designed to bring mankind to its knees. But Mack's not interested in world domination. He's just a bot trying to get by, trying to demonstrate that he isn't just an automated smashing machine, and to earn his citizenship in the process. It should be as easy as crushing a tank for Mack, but some bots just can't catch a break. When Mack's neighbors are kidnapped, Mack sets off on a journey through the dark alleys and gleaming skyscrapers of Empire

City. Along the way, he runs afoul of a talking gorilla, a brainy dame, a mutant lowlife, a little green mob boss, and the secret conspiracy at the heart of Empire's founders---not to mention more trouble than he bargained for. What started out as one missing family becomes a battle for the future of Empire and every citizen that calls her home.
