Researching family history has become increasingly popular in recent years. The

documents held at the Public Record Office and the Family Records Centre span over 1,000 years and contain a wealth of information for family historians. This revised and expanded sixth edition of the publication provides a guide to using the national archives of England, Wales and the UK. It

contains guidance on: using basic family history records, such as the census, wills and records for birth, marriage, death; tracing records regarding migration; researching the background of people from a wide range of professional, religious, social and regional groups; using military and legal records; and using the Public Record Office online catalogue.

Named one of the best books of 2019 by The Economist and a New York Times Book Review Editors' Choice. A National Jewish Book Award finalist. "A superb and touching book about the frailty of ties that hold together places and people." --The New York Times Book Review An

award-winning historian shares the true story of a frayed and diasporic Sephardic Jewish family preserved in thousands of letters. For centuries, the bustling port city of Salonica was home to the sprawling Levy family. As leading publishers and editors, they helped chronicle modernity as it was experienced by Sephardic Jews across the Ottoman Empire. The wars of the twentieth century, however, redrew the borders around them, in the process transforming the Levys from Ottomans to Greeks. Family members soon moved across boundaries and hemispheres, stretching the familial diaspora from Greece to Western Europe, Israel, Brazil, and India. In time, the Holocaust nearly eviscerated the clan, eradicating whole branches of the family tree. In *Family Papers*, the prizewinning Sephardic historian Sarah Abrevaya Stein uses the

family ' s correspondence to tell the story of their journey across the arc of a century and the breadth of the globe. They wrote to share grief and to reveal secrets, to propose marriage and to plan for divorce, to maintain connection. They wrote because they were family. And years after they frayed, Stein discovers, what remains solid is the fragile tissue that once held them together: neither blood nor belief, but papers. With meticulous research and care, Stein uses the Levys' letters to tell not only their history, but the history of Sephardic Jews in the twentieth century.

From family trees written in early American bibles to birther conspiracy theories, genealogy has always mattered in the United States, whether for taking stock of kin when organizing a family reunion or drawing on membership—by blood or other means—to claim rights to land, inheritances, and more. And since the advent of DNA kits that purportedly trace genealogical relations through genetics, millions of people have used them to learn about their medical histories, biological parentage, and ethnic background. A Nation of Descendants traces Americans' fascination with tracking family lineage through three centuries. Francesca Morgan examines how specific groups throughout history grappled with finding and recording their forebears, focusing on Anglo-American white, Mormon, African American, Jewish, and Native American

people. Morgan also describes how individuals and researchers use genealogy for personal and scholarly purposes, and she explores how local businesspeople, companies like Ancestry.com, and Henry Louis Gates Jr.'s Finding Your Roots series powered the commercialization and commodification of genealogy. Farrar, Straus and Giroux

This book contains the papers delivered at sessions organised by the Genealogy and Local History Section at the annual conferences of the International Federation of Library Associations and Institutions (IFLA) between 2001 and 2005; many of these are updated versions of the original presentations. A wide range of significant issues and trends in historical and family research is covered. The authors, all experts in their own fields, address those engaged in delivering genealogy and local history services in libraries, archives and museums across the world. Moreover, they focus on the growing army of enthusiasts directly engaged in tracing their own ancestral and local history. Several papers give

useful hints on how various resources can be used to further personal research. These include the exciting opportunities offered by the digitisation of primary resources and by the impact of the powerful new technology, among other things now on offer through DNA profiling.

Included in this book, *Telling Our Stories: A Collection of Family History Narratives*, are biographical profiles researched, written, and compiled by members of the Fred Hart Williams Genealogical Society (FHWGS), a Detroit-based organization established in 1979 to research and preserve African American family history and culture. During 2019, the Society solicited family history narratives from its members to create a book for publication to form a lasting legacy in honor of the Society's

fortieth anniversary. The response was overwhelming. These narratives are a testament to the resilience, persistence, tragedy, and triumphs of our ancestors who endured the brutality of enslavement, the horrors of post-civil war terrorism, Jim Crow Laws, racial discrimination, and the terrorism perpetrated in response to the civil rights movement. These narratives reflect how that history shaped the world the descendants of those ancestors would inherit. There are families that escaped enslavement on the Underground Railroad. There are families whose ancestors were freedom fighters. There are families that would emerge from enslavement to share-cropping to migrating to the promise of hope in the industrial north. With the passing of each generation, we risk the loss of history that is not recorded. It is the mission of the Fred Hart Williams Genealogy Society to

preserve that history. Tracing Your Ancestry Rockport Publishers City of Remembering represents a rich testament to the persistence of a passionate form of public history. In exploring one particular community of family historians in New Orleans, Susan Tucker reveals how genealogists elevate a sort of subterranean foundation of the city--sepia photographs of the Vieux Carré, sturdy pages of birth registrations from St. Louis Cathedral, small scraps of the earliest French Superior Council records, elegant and weighty leaves of papers used by notaries, and ledgers from the judicial deliberations of the Illustrious Spanish Cabildo. They also explore coded letters left by mistake, accounts carried over oceans, and gentle prods of dying children to be counted and thus to be remembered. Most of all, the family historians speak of continual beginnings,

both in the genesis of their own research processes, but also of American dreams that value the worth of every individual life. The author, an archivist who has worked for over thirty years asking questions about how records figure in the lives of individuals and cultures, also presents a national picture of genealogy's origins, uses, changing forms, and purposes. Tucker examines both the past and the present and draws from oral history interviews, ethnographic fieldwork, and archival research. Illustrations come from individuals, archives, and libraries in New Orleans; Richmond; Washington, DC; and Salt Lake City, as well as Massachusetts and Wisconsin, demonstrating the contrasts between regions and how those practitioners approach their work in each setting. Ultimately, Tucker shows that genealogy is more than simply tracing lineage--the pursuit becomes a fascinating window into people,

neighborhoods, and the daily life of those individuals who came before us.
