This important book examines the motives that drive family historians and explores whether those who research their ancestral pedigrees have distinct personalities, demographics or family characteristics. It describes genealogists' experiences as they chart their family trees including their insights, dilemmas and the fascinating, sometimes disturbing and often

surprising, outcomes of their searches. Drawing on theory and research from psychology and other humanities disciplines, as well as from the authors' extensive survey data collected from over 800 amateur genealogists, the authors present the experiences of family historians, including personal insights, relationship changes, mental health benefits and ethical dilemmas. The book emphasises the motivation behind this exploration, including the need to acknowledge and tell ancestral stories, the spiritual and health-related aspects of genealogical research, the addictiveness of the detective work, the lifelong learning opportunities and the passionate desire to find lost relatives. With its focus on the role of family history in shaping personal identity and contemporary culture, this is fascinating reading for anyone studying genealogy and family history, professional genealogists and those researching their own history.

The Unofficial Family Archivist Family Tree Books
Although millions of African American women were held in bondage over the 250 years that slavery was legal in the United States, Harriet Jacobs (1813-97) is the only one known to have left papers testifying to her life. Her autobiography, Incidents in the Life of a Slave Girl, holds a central place in the canon of American literature as the most important slave narrative by an African American woman. Born in Edenton, North Carolina, Jacobs escaped from her owner in her mid-twenties and hid in the cramped attic crawlspace of her grandmother's house for seven years before making her way

north as a fugitive slave. In Rochester, New York, she became an active abolitionist, working with all of the major abolitionists, feminists, and literary figures of her day, including Frederick Douglass, Lydia Maria Child, Amy Post, William Lloyd Garrison, Susan B. Anthony, Harriet Beecher Stowe, Fanny Fern, William C. Nell, Charlotte Forten Grimke, and Nathan Parker Willis. Jean Fagan Yellin has devoted much of her professional life to illuminating the remarkable life of Harriet Jacobs. Over three decades of painstaking research, Yellin has discovered more than 900 primary source documents, approximately 300 of which are now collected in two volumes. These letters and papers written by, for, and about Jacobs and her activist brother and daughter provide for the thousands of readers of Incidents--from scholars to schoolchildren--access to the rich historical context of Jacobs's struggles against slavery, racism, and sexism beyond what she reveals in her pseudonymous narrative. Accompanied by a CD containing a searchable PDF file of the entire contents, this collection is a crucial launching point for future scholarship on Jacobs's life and times.

Genealogy 101 Bloomsbury Publishing

Family history is one of the most widely practiced forms of public history around the globe, especially in settler migrant nations like Australia and Canada. It empowers millions of researchers, linking the past to the present in powerful ways, transforming individuals' understandings of themselves and the world. This book examines the practice, meanings and impact of undertaking family history research for individuals and society more broadly. In this ground-breaking new book, Tanya Evans shows how family history fosters inter-generational and cross-cultural, religious and ethnic knowledge, how it shapes historical empathy and consciousness and combats social exclusion, producing active citizens. Evans draws on her extensive research on family history, including survey data, oral history interviews and focus groups undertaken with family historians in Australia, England and Canada collected since 2016. Family History, Historical Consciousness and Citizenship reveals that family historians collect and analyse varied historical sources, including oral testimony, archival documents, pictures and objects of material culture. This book reveals how people are thinking historically outside academia, what historical skills they are using to produce historical knowledge, what knowledge is being produced and what impact that can have on them, their communities and scholars. The result is a necessary revival of the current perceptions of family history.

Guide to Local and Family History at the Newberry Library Family Papers A recent Maritz Poll reported that 60% of Americans are interested in their family history. And with good reason. Through genealogy, you can go back into history to meet people who have had more influence on your life than any others -- your ancestors. And the better you get to know your ancestors, the better you will get to know yourself: the who's and what's and why's of you. Barbara Renick, a nationally-known lecturer on genealogy, tells the uninitiated researcher the steps needed to find out who their ancestors really were, and brings together for even the more experienced genealogical researchers the important principles and practices. She covers such topics as the importance of staying organized and how to go about it; where and how to look for information in libraries, historical societies, and on the internet; recognizing that just because something is in print doesn't mean it's right; and how to prepare to visit the home where your ancestors lived. Genealogy 101 is the first book to read when you want to discover who your ancestors were, where they lived, and what they did.

Origins of New Mexico Families Penguin

Named one of the best books of 2019 by The Economist and a New York Times Book Review Editors' Choice. A National Jewish Book Award finalist. "A superb and touching book about the frailty of ties that hold together places and people." --The New York Times Book Review An award-winning historian shares the true story of a frayed and diasporic Sephardic Jewish family preserved in thousands of letters For centuries, the bustling port city of Salonica was home to

the sprawling Levy family. As leading publishers and editors, they helped chronicle modernity as it was experienced by Sephardic Jews across the Ottoman Empire. The wars of the twentieth century, however, redrew the borders around them, in the process transforming the Levys from Ottomans to Greeks. Family members soon moved across boundaries and hemispheres, stretching the familial diaspora from Greece to Western Europe, Israel, Brazil, and India. In time, the Holocaust nearly eviscerated the clan, eradicating whole branches of the family tree. In *Family Papers*, the prizewinning Sephardic historian Sarah Abrevaya Stein uses the family's correspondence to tell the story of their journey across the arc of a century and the breadth of the globe. They wrote to share grief and to reveal secrets, to propose marriage and to plan for divorce, to maintain connection. They wrote because they were family. And years after they frayed, Stein discovers, what remains solid is the fragile tissue that once held them together: neither blood nor belief, but papers. With meticulous research and care, Stein uses the Levys' letters to tell not only their history, but the history of Sephardic Jews in the twentieth century.

Gill Blanchard's practical step-by-step guide to writing a family history is designed for anyone who wants to bring their ancestors' stories to life. She looks at ways of overcoming the particular problems family historians face when writing a family history -- how to deal with gaps in knowledge, how to describe generations of people who did the same jobs or lived in the same area, how to cover the numerous births, marriages and deaths that occur, and when to stop researching and start writing. Her book provides examples to help readers find their own writing style, deal with family stories, missing pieces of information and anomalies. It also offers advice on key aspects of composition, such as adding local and social history context and using secondary material. The focus throughout is on how to develop a story from beginning to end. Exercises are a key feature of the text. There is guidance on the various formats a family history can take and how to choose the appropriate one, with examples of format and layout. Production and publishing are also covered -- books, booklets, newsletters, websites, blogs and ebooks.
