What Is a Family Nurse Practitioner? A family nurse practitioner, or FNP, is a highly educated registered nurse who provides primary or specialty care for patients of all ages. These advanced-practice registered nurses typically work under a physician but with a high

degree of autonomy, and in some cases, have their own private practices. They provide most of the same services a doctor provides, and are the primary source of care for many patients.

Standards of Practice for Nurse Practitioners Nurse practitioners are licensed, independent practitioners who practice autonomously and in coordination with health care professionals and other individuals. They provide primary and/or specialty nursing and medical care in ambulatory, acute, and long-term care settings. NPs are registered nurses with specialized, advanced education and clinical practice competency to provide health care for diverse populations in a variety of primary care, acute, and long-term care settings.

Practice Guidelines For Family Nurse

Practitioners 4e

A family nurse practitioner (FNP) provides continuing and comprehensive healthcare for the individual and family across all ages, genders, diseases, and body systems. Primary care emphasizes the holistic nature of health and it is based on knowledge of the patient in the context of the family and the community, emphasizing disease prevention and health promotion.

Family Nurse Practitioner Guidelines

No set pathway determines how to become a family nurse practitioner. Every FNP ' s journey varies according to their individual circumstances. FNPs must hold a master ' s degree, which takes about 2-3 years to complete. FNP nurses must also earn state licensure and pass the national certification exam.
