Nathaniel Miles and Adelaide Winston had been best friends since they were ten years old. They may have been as different as chalk and cheese but they were always there for

each other. Addy's life was going as well as could be expected of any twenty five year old. She had a fine job and a new apartment with her boyfriend of going on a year, Stanford. The most important thing in her life though was still Nate. Stanford often complained that she spent more time with Nate than him but Addy couldn't help it. Nate had seen her through a lot of her life, whether good or bad. He was her rock, the one person she could always depend on. So when Addy

---

finds out that Stanford has been sleeping with one of her co-workers, she of course turns to Nate. The one person she knew she could trust more than anything. Her wonderful best friend offers her everything from the keys to his front door to a new job. Between ex's trying to take from them, they stand together as always. She knew that her heart had been with her best friend for many, many years. All she could wonder was if Nate felt the same for her.

12-14% of UK businesses are majority owned by women, a statistic that shows both the great strides

---

women have made in business in the past two decades and how many obstacles still remain in a culture where 90% of the top roles are held by men. Jo Haigh has worked for many years in corporate finance, and has experienced these obstacles, and overcome them. In *Tales from the Glass Ceiling*, she offers women an inspirational guide to success in the male-dominated business world - a goal, that does not mean losing your identity. Haigh offers stories of success from many different areas of business, giving advice on how to reconcile an open, emotional disposition with an executive level's occasionally brutal atmosphere; how to spot the right training and development opportunities (and get them funded); how

to overcome resistance to female leadership and how to build, manage and maintain your professional network. Based on Haigh's own experience as an executive and entrepreneur, and bolstered by the experiences and stories of other top women in their fields, *Tales from the Glass Ceiling* is an indispensable resource for all women in business.

What is a dangerous man?

Most women would answer: one who is physically violent. But abusive behavior is often more insidious. Men who want mothers, not partners, who prey on lonely, passive women, who are mentally ill, addicted, or emotionally unavailable, or who won't go away when asked to leave all fall into this dangerous category. Most women who have dated one dangerous man have in fact dated two or three, according to research. How to Spot a Dangerous Man Workbook, designed for use with the author's book How to Spot a Dangerous Man Before You Get Involved, contains useful exercises from the author's highly successful workshops for women, including 22 worksheets and quizzes to help readers develop their own personalized list of "do not date" characteristics. The author's extensive research in this field makes this hands-on guide an important aid in both

avoiding a potentially dangerous involvement and recognizing ? and getting out of ? an existing one.

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? "Design justice" is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work

---

closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to “build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability.” Along the way, the book documents a multitude of real-world

community-led design practices, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own

community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage-courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. \* \* \* \* \*

\*Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it- but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled

---

out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any

industry-approved repair manuals, but it is safe and it works,"-would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?
