British Fashion Design Ramesh Publishing House

British Fashion Design explores the tensions between fashion as art form, and

the demands of a ruthlessly commercial industry. Based on interviews and research conducted over a number of years, Angela McRobbie charts the flow of art school fashion graduates into the industry; their attempts to reconcile training with practice, and their precarious position between the twin supports of the education system and the commercial sector. Stressing the social context of cultural production, McRobbie focuses on British fashion and its graduate designers as products of youth street culture, and analyses how designers from diverse backgrounds have created a labour market for themselves, remodelling `enterprise culture` to suit their own careers.

Sewing patterns have been the principle blueprint for making garments in the home for centuries. From their origins in the tailoring manuals of the 16th century to the widely produced pamphlets of the 18th and 19th centuries, through to the full size packet patterns of today, their history and development has reflected major changes in technology (such as the advent of the sewing machine), retailing and marketing practices (the fashion periodical), and shifts in social and cultural influences. This accessible book explores this history, outlining innovations in patternmaking by the companies who produced patterns and how these reflected the

fashions and demands of the market. Showcasing beautiful illustrations from original pattern pamphlets, packets and ads, as well as 9 complete patterns from which readers can reproduce vintage garments of different eras, the book provides a unique visual guide to homemade fashions as well as essential exploration of the industry that produced them.
