Discusses how technology has  
transformed the modern world through a  
series of essays that examine recent  
technological developments, the hype

surrounding the electronic world, and the  
implications and opportunities of  
technology.

Tau Zero Vintage

In *Pressed for Time*, Judy Wajcman explains why  
we immediately interpret our experiences with  
digital technology as inexorably accelerating  
everyday life. She argues that we are not mere  
hostages to communication devices, and the  
sense of always being rushed is the result of the  
priorities and parameters we ourselves set rather  
than the machines that help us set them."--Jacket.

*Accelerated Expertise* Vintage Canada

"Version 2.0 with a new  
afterword"--Cover.

*Workplace Poker* University of Chicago  
Press

*Formula X* is a business fable about speed,  
leadership and organizational change.

---

Many organizations struggle to adapt to our fundamentally faster world. For companies and professionals, it often feels like they have to make an ultimate choice: quality or speed. But speed does not have to result in bad work--and Formula 1 motor racing proves this. Within the two weeks between races, they perform the enormous job of analyzing all data, designing and producing new components, shipping, assembling and testing. How do they do that? And what can we learn from F1 in applying these lessons to our workplaces? Formula X tells the story of Ronald Park, director of a large kitchen manufacturer. He will lose his job if he fails to significantly reduce the delivery time of his kitchens to under two weeks. As he takes up this challenge, he manages to get his organization closer to this goal, step by step. He receives unexpected help from the team captain of a well-known Formula 1 team. Ronald successfully implements several F1 lessons in his company. But just when Ronald thinks he made it, things change to the worse. How will he manage? How will he keep his company alive? In Formula X you will learn the secrets to reaching extreme acceleration in your organization!

Social Acceleration John Wiley & Sons

A career advisor explains why many talented, hard-working people often miss out on their full career potential, revealing the tells, blind spots, secrets, and unspoken rules you need to know in order to play the game to win. While many careers have been impacted by economic downturns, failed projects, downsizing and restructuring, or just bad bosses or bad timing, we all know of colleagues who

---

continue to rise through every tough situation. Most assume that they have an advantage that protects them—degrees from the right schools, great mentors, influential friends and family, or just better luck. But these hyper-successful professionals have faced setbacks, too. Instead of allowing challenges to derail their rise, they ’ ve learned how to manage them better. In *Workplace Poker*, Dan Rust gives you the strategies you need to accelerate your career, and prevent setbacks from stalling your progress or spiraling it downward. The trick, he reveals, is to “ play the game under the game, ” to think more deeply and act more strategically. If you are talented, ambitious, and hardworking, but feel your career just isn ’ t accelerating as rapidly as it should, or as fast as you would like it to, this book is for you. If you have been frustrated to see others (less talented, who don ’ t work as hard as you do) achieve rapid professional progress while your career stalls out, this book is for you. If you ’ ve been annoyed by those who are successful primarily because of where they went to school, or family connections, or financial resources, this book is for you. Rust gives you the insight and skills you need to transform yourself and adapt and survive any hurdle—to turn every adversity into advantage, and every struggle into strength, including:

- Recognition of your own “ blind spots ” and what to do about them
- Mastering strategic and authentic self-promotion
- Enhancing your personal charm and likeability
- Achieving the high energy, both mental and physical, necessary to drive an exceptional career trajectory
- Developing an interest in “ corporate anthropology ” and the complex human dimensions of business
- Neutralizing the career-stalling impact of difficult or dysfunctional colleagues
- Deeply “ owning ” and learning from career missteps and failures

In his smart, funny, relatable voice, Rust shares stories of individuals who have applied these capabilities in real world situations, and provides short, focused

---

exercises to help you think about yourself and your own career. With Workplace Poker , you ' ll learn how to get out of you own way, and find the success you deserve.

### Abundance Bantam

Featuring more than five hundred questions from past Regents exams with worked out solutions and detailed illustrations, this book is integrated with APlusPhysics.com website, which includes online questions and answer forums, videos, animations, and supplemental problems to help you master Regents Physics Essentials.

### The Speed Encyclopedia Harvard Business Review Press

"The Speed Encyclopedia is a comprehensive training strategy designed primarily for serious team sport athletes

looking to maximize their speed and athletic potential. This unique "no-nonsense" approach will openly challenge conventional wisdom on the topic and leave absolutely no stone left uncovered, in an honest attempt to discover and disclose the scientific truth for how to make you or your athletes faster. Inside you will witness many years worth of research that is highly controversial, yet highly objective. This system has been successfully utilized by athletes all over the country of all sport types from the youth to professional ranks. If you are looking for a proven program that will deliver "fast" results in both the short and long-term, than I can assure you this book is for you!"

evolutionary and emergent properties of nature in software? How can understanding the mathematical principles behind our physical world help us to create digital worlds? This book focuses on a range of programming strategies and techniques behind computer simulations of natural systems, from elementary concepts in mathematics and physics to more advanced algorithms that enable sophisticated visual results. Readers will progress from building a basic physics engine to creating intelligent moving objects and complex systems, setting the foundation for further experiments in generative design. Subjects covered include forces, trigonometry, fractals, cellular automata, self-organization, and genetic algorithms. The book's examples are written in Processing, an open-source language and development environment built on top of the Java programming language. On the book's website (<http://www.natureofcode.com>), the examples run in the browser via Processing's JavaScript mode.

Thank You for Being Late Simon and Schuster  
It's a hot, hot summer, and in the depths of the Toronto Transit Authority's Lost and Found, 17-year-old Duncan is cataloging lost things and sifting through accumulated junk. And between Jacob, the cranky old man who runs the place, and the endless dusty boxes overflowing with stuff no one will ever claim, Duncan's just about had enough. Then he finds a little leather book. It's a diary filled with the dark and dirty secrets of a twisted mind, a serial killer stalking his prey in the subway. And Duncan can't make himself stop reading. What would you do with a book like that? How far would you go to catch a madman? And

A contemplation on “ the durability of our fast-tracked, multitasked modern world . . . a stimulating cautionary report for the digital age. ” —Kirkus Reviews We live in an ever-accelerating world: faster computers, markets, food, fashion, product cycles, minds, bodies, kids, lives. When did everything start moving so fast? Why does speed seem so inevitable? Is faster always better? Drawing together developments in religion, philosophy, art, technology, fashion, and finance, Mark C. Taylor presents an original and rich account of a great paradox of our times: how the very forces and technologies that were supposed to free us by saving time and labor now trap us in a race we can never win. The faster we go, the less time we have, and the more we try to catch up, the farther behind we fall. Connecting our speed-obsession with today ’ s global capitalism, he composes a grand narrative showing how commitments to economic growth and extreme competition, combined with accelerating technological innovation, have brought us close to disaster. Psychologically, environmentally, economically, and culturally, speed is taking a profound toll on our lives. By showing how the phenomenon of speed has emerged, Taylor offers us a chance to see our pace of life as the product of specific ideas, practices, and policies. It ’ s not inevitable or irreversible. He courageously and movingly invites us to imagine how we might patiently work towards a more deliberative life and sustainable world. “ With panache and flashes of brilliance, Taylor, a Columbia University religion professor and cultural critic, offers a philosophically astute analysis of how time works in our era. ” —Publishers Weekly

## Contemporary Authors New Revision Series Open Road Media

From the bestselling author of the acclaimed *Chaos and Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa ' s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not

only how we look at the world, but how we live. A New York Times Notable Book A Los Angeles Times and Cleveland Plain Dealer Best Book of the Year Winner of the PEN/E. O. Wilson Literary Science Writing Award

### Better and Faster Taylor & Francis

This Hugo Award finalist, “ justifiably regarded as a classic ” (SFReviews.net), is the tale of an epic space voyage where time dilation goes horribly wrong. Aboard the spacecraft *Leonora Christine*, fifty crewmembers, half men and half women, have embarked on a journey of discovery like no other to a planet thirty light-years away. Since their ship is not capable of traveling faster than light, the crew will be subject to the effects of time dilation and relativity. They will age five years on board the ship before reaching their destination, but thirty-three years will pass on Earth.

Experienced scientists and researchers, they

---

have come to terms with the time conditions of their space travel. Until . . . the Leonora Christine passes through an uncharted nebula, which damages the engine, making it impossible to decelerate the ship on the second half of their trip. To survive, the crewmembers have no choice but to bypass their destination and continue to accelerate toward the speed of light. But how will they keep hope alive and maintain order as they hurtle deeper into space with time passing more and more rapidly, and their ultimate fate unknown? With its combination of mind-blowing hard science and compelling human drama, Tau Zero is “ the ultimate hard science novel ” (Mike Resnick).

Promoted Picador USA

In today ’ s ultra-competitive, breakneck world, getting superior results at the fastest rate possible is critical to success. But the hectic speed of life can make it easy to become sidetracked by things that

cloud our sense of priority, making us less effective. Strategic Acceleration: Succeed at the Speed of Life presents a methodology that will help you get clear, stay focused, and efficiently execute relevant, high-value activities that bring you the results and success you want—faster. The Strategic Acceleration approach is based on three pivotal concepts: 1. Clarity: Understand your targets and the “ why ” behind reaching them; 2. Focus: Concentrate on what really matters and filter out what does not; 3. Execution: Use effective communication to get things accomplished—faster! Strategic Acceleration will help you develop a clear vision, outline priorities and objectives, and tackle goals with a true sense of urgency and focus. Once understood and deployed, Strategic Acceleration is sure to have a powerful, long-term, positive influence on the results and success that so many want yet rarely know how to achieve.

The Nature of Code Currency

From the bestselling, National Book Award-

---

nominated author of *Genius and Chaos*, a bracing new work about the accelerating pace of change in today's world. Most of us suffer some degree of "hurry sickness," a malady that has launched us into the "epoch of the nanosecond," a need-everything-yesterday sphere dominated by cell phones, computers, faxes, and remote controls. Yet for all the hours, minutes, and even seconds being saved, we're still filling our days to the point that we have no time for such basic human activities as eating, sex, and relating to our families. Written with fresh insight and thorough research, *Faster* is a wise and witty look at a harried world not likely to slow down anytime soon.

Speed Limits *Faster*

Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory. He identifies in particular three categories of change in the

---

tempo of modern social life: technological acceleration, evident in transportation, communication, and production; the acceleration of social change, reflected in cultural knowledge, social institutions, and personal relationships; and acceleration in the pace of life, which happens despite the expectation that technological change should increase an individual's free time. According to Rosa, both the structural and cultural aspects of our institutions and practices are marked by the "shrinking of the present," a decreasing time period during which expectations based on past experience reliably match future results and events. When this phenomenon combines with technological acceleration and the increasing pace of life, time seems to flow ever faster, making our relationships to each other and the world fluid and problematic. It is as if we are

standing on "slipping slopes," a steep social terrain that is itself in motion and in turn demands faster lives and technology. As Rosa deftly shows, this self-reinforcing feedback loop fundamentally determines the character of modern life.
