#1 NEW YORK TIMES BESTSELLER • The game-changing author of *Tribe of Mentors* teaches you how to reach your peak physical potential with minimum effort. "A practical crash course in how to reinvent

yourself."—Kevin Kelly, *Wired* Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. *The 4-Hour Body* is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It's the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it's all here, and it all works. You will learn (in less than 30 minutes each):

- How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails
- How to prevent fat gain while bingeing over the weekend or the holidays
- How to sleep 2 hours per day and feel fully rested
- How to produce 15-minute female orgasms
- How to triple testosterone and double sperm count
- How to go from running 5 kilometers to 50 kilometers in 12 weeks
- How to reverse "permanent" injuries
- How to pay for a beach vacation with one hospital visit

And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That's exactly what *The 4-Hour Body* delivers.

CONTENTS: Army Combat Fitness Test Training Guide Version 1.2 FIELD TESTING MANUAL Army Combat Fitness Test Version 1.4 Army Combat Fitness Test CALL NO. 18-37, September 2018 FM 7-22 ARMY PHYSICAL READINESS TRAINING, October 2012 IOC TESTING - ACFT EQUIPMENT LIST (1 X LANE REQUIREMENT) Version 1.1, 4 September 2018 ACFT Field Test Highlight Poster (Final) OVERVIEW: The Army will replace the Army

Physical Fitness Test (APFT) with the Army Combat Fitness Test (ACFT) as the physical fitness test of record beginning in FY21. To accomplish this, the ACFT will be implemented in three phases. Phase 1 (Initial Operating Capability – IOC) includes a limited user Field Test with approximately 60 battalion-sized units from across all components of the Army. While the ACFT is backed by thorough scientific research and has undergone several revisions, there are still details that have not been finalized. The ACFT requires a testing site with a two-mile run course and a flat field space approximately 40 x 40 meters. The field space should be grass (well maintained and cut) or artificial turf that is generally flat and free of debris. While maintaining testing standards and requirements, commanders will make adjustments for local conditions when necessary. The start and finish point for the two-mile run course must be in close proximity to the Leg Tuck station. When test events are conducted indoors, the surface must be artificial turf only. Wood and rubberized surfaces are not authorized as they impact the speed of the Sprint-Drag-Carry. When environmental conditions prohibit outdoor testing, an indoor track may be used for the 2 Mile Run. The Test OIC or NCOIC are responsible to inspect and certify the site and determine the number of testing lanes. There should not be more than 4 Soldiers per testing group for the SPT, HRP, and SDC. The OIC or NCOIC must add additional lanes or move Soldiers to a later testing session to ensure no more than 4 Soldiers per testing group. Concerns related to Soldiers, graders, or commanders will be addressed prior to test day. The number of lanes varies by number of Soldiers testing. A 16-lane ACFT site will have the following: ACFT specific test equipment requirements: 16 hexagon/trap bars (60 pounds), each with a set of locking collars. While all NSN approved hexagon bars must weigh 60 pounds, there is always a small manufacturer's production tolerance. The approved weight tolerance for the hexagon bar is + 2 pounds (58-62 pounds). Weight tolerance for the hexagon bar and therefore the 3 Repetition Maximum Deadlift does not include the collars. On average hexagon bar collars weigh < 2.0 pounds per pair and are considered incidental to the total weight of the MDL weight. Approximately 3,000 lbs. of bumper plates. 16 x 10 lb. medicine ball 16 x nylon sled with pull straps. 32 x 40 lb. kettle bells. Permanent or mobile pull up bars (16 x pull-up bars at approximately 7.5 feet off the ground with step-ups for shorter Soldiers). Common unit equipment for set-up and grading: 16 stop watches. 8 x 25m tape measures. 8 x wooden or PVC marking sticks for the SPT. One stick for every two lanes. 70 x 18 " traffic cones. 50 field / dome cones. A soft, flat, dry test area approximately 40m x 40m on grass or artificial turf (half of a soccer or football field). A site that is free of any significant hazards. A preparation area (can be same as briefing area) to conduct Preparation Drill. A generally flat, measured running course with a solid, improved surface that is not more than 3 percent uphill grade and has no overall decline (start and finish must be at the same altitude).

You are sure to call it your fitness bible for many years to come.

Army Physical Readiness Training Manual Human Kinetics

Body transformations are the most sought-after type of training in the fitness world. It is now understood by the leading magazines, gym chains and industry as a whole, that training for a marathon, getting into

swimming or general exercise (like squash) will not give people the bikini body or rippling six pack they would like. The simple truth is that the task is challenging and exercise is actually only about one-third of the battle. This manual gives you the information to get the exercise bit right, as well as how to manage the nutrition, sleep and stress that goes into the other, arguably more important, two-thirds. The Body Transformation Manual includes: A complete step-by-step workout plan Basic nutritional information to help you understand what you really need Explanation of when and what to eat to maximize fat loss and muscle gain Advice, tips and experience from a top London trainer Male and female specifics Proven methods from the author, and his pointers on the best methods utilized by others List of equipment needed Weight-training protocols explained Interval training (HIIT) over slow runs (LISS) explained Fire-Up Your Fat Burn!
