True Stories of Insider Threats and Enterprise Security Management Countermeasures. John Wiley & Sons
Tombs and burial customs are an exquisite source for social history, as their commemorative character determines them to express much of the contemporaneous ideology of a society. This book presents, for the first time, a holistic view of the funerary culture of Rome and its surroundings during the third century AD. Barbara Borg argues that during this time there was, in many ways, a return to practices known from the Late Republic and early imperial period, with spectacular monuments for the rich, and a large-scale reappearance of collective burial spaces. Through a study of terraced tombs, élite monuments, the catacomb nuclei, sarcophagi, and painted image decoration, this volume explores how the third century was an exciting period of experimentation and creativity.

Today's headlines are littered with news of identity thieves, organized cyber criminals, corporate espionage, nation-state threats, and terrorists. They represent the next wave of security threats but still possess nowhere near the devastating potential of the most insidious threat: the insider. This is not the bored 16-year-old hacker.
