Control ...**

The purpose of code P0128 is
to track the amount of time the
engine requires to reach and
maintain the correct operating
temperature. This enables the
fuel system to operate in a
"closed loop" condition, where

the Fuel Control or Air Fuel
Ratio is being actively
influenced by the two or more
Oxygen Sensors located in the
Exhaust System.

MID 128, PID 94 Fuel Delivery Pressure - Parsianind

This means that the engine's
powertrain control module
(PCM) has detected that the
engine has not reached the
required temperature level
within a specified amount of
time after starting the

engine. Often, the intent of
the P0128 code is to indicate
a faulty thermostat (likely
stuck in the open condition).
