Curriculum-Based Assessment for Instructional Design ASCD Teacher Evaluation: Guide to Professional Practice is organized around four dominant, interrelated core issues: professional standards, a guide to applying the Joint Committee's Standards, ten alternative models for the evaluation of teacher performance, and an analysis of these selected models. The book draws heavily on research and development conducted by the Federally funded national Center for Research on Educational Accountability and Teacher Evaluation (CREATE). The reader will come to grasp the essence of sound teacher evaluation and will be able to apply its principles, facts, ideas, processes, and procedures. Finally, the book invites and assists school professionals and other readers to examine the latest developments in teacher evaluation.

Parents Involved in Community Schools (2007) V. Seattle School District No. 1 (2007). OECD Publishing READ 180 is a comprehensive reading intervention program designed to meet the needs of elementary to middle school students whose reading achievement is below the proficient level. The program directly addresses individual needs through differentiated instruction, adaptive and instructional software, high-interest literature, and direct instruction in reading, writing, and vocabulary skills. Stage A provides tools for young struggling readers in elementary school to

develop critical literacy skills. Stage B provides middle school struggling readers with topics designed for their level of reading that hold their interest. System 44 was designed for the most challenged, older struggling readers, and helps these students understand that the English language is a finite system of 44 sounds and 26 letters that can be mastered. It uses validated assessment for screening and placement, research-based phonics instruction and highly motivating and age-appropriate adaptive technology.

The Unintended Consequences of High-Stakes Testing Rand Corporation

Education Reform in the American States is a timely evaluation of the accountability movement in American public education, culminating in the No Child Left Behind Act, federal legislation of 2002. The authors treat the current accountability movement, placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding. They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states' prospects for meeting their NCLB targets. The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act, particularly its incentives for states to

lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students. The audience for this study includes local, state and federal education policy makers; administrators and instructors in schools of education and other teaching programs, educators; and the general public.

Test-based accountability systems that attach high stakes to standardized test results have raised a number of issues on educational assessment and accountability. Do these high-stakes tests measure student achievement accurately? How can policymakers and educators attach the right consequences to the results of these tests? And what kinds of tradeoffs do these testing policies introduce? This book responds to the growing emphasis on high-stakes testing and offers recommendations for more-effective test-based accountability systems.

"A tool box overflowing with ideas that will help every staff developer craft a school culture hospitable to adult and student learning."

—Roland S. Barth, Author, *Lessons Learned* "The book speaks to many audiences, including instructional coaches, PLC leaders, action researchers and group leaders, and university professors working with action researchers and PLCs." —Gail Ritchie, Coleader, Teacher Researcher Network Fairfax County Public Schools, VA "A terrific resource for connecting teacher networks and action research to create powerful professional development opportunities. This book is a joy to read." —Ellen Meyers, Senior Vice President Teachers Network Powerful tools for facilitating teachers' professional development and optimizing school improvement efforts! Professional learning communities (PLCs) and action research are popular and proven frameworks for professional development. While both can greatly improve teaching and learning, few resources have combined the two practices into one coherent approach. *The Reflective Educator's Guide to Professional Development* provides educators with strategies, activities, and tools to develop inquiry-oriented PLCs. Nationally

known school reform experts Nancy Fichtman Dana and Diane Yendol-Hoppey cover the ten essential elements of a healthy PLC, provide case studies of actual inquiry-based PLCs, and present lessons learned to help good coaches become great coaches. With this step-by-step guide, readers will be able to: Organize, assess, and maintain high-functioning, inquiry-oriented PLCs Facilitate the development of study questions Establish the trust and collective commitment necessary for successful action research Enable PLC members to develop, analyze, and share research results Lead successful renewal and reform efforts By combining two powerful training practices, coaches, workshop leaders, and staff developers can ensure continuous, robust school-based professional development.

The Golden Touch Teaching Resources

More than 2 million adults are incarcerated in U.S. prisons, and each year more than 700,000 leave federal and state prisons and return to communities. Unfortunately, within three years, 40 percent will be reincarcerated. One reason for this is that ex-offenders lack the knowledge, training, and skills to support a successful return to communities. Trying to reduce such high recidivism rates is partly why states devote resources to educating and training individuals in prison. This raises the question of how effective -- and cost-effective -- correctional education is: an even more salient question given the funding environment states face from the 2008 recession and its continuing aftermath. With funding from the Second Chance Act of 2007, the Bureau of Justice Assistance, U.S. Department of Justice, asked RAND to help answer this question as part of a comprehensive examination of the current state of correctional education for incarcerated adults and juveniles. The RAND team conducted a systematic review of correctional education programs for incarcerated adults and juveniles. This included a meta-analysis on correctional education's effects on recidivism and postrelease employment outcomes for incarcerated adults, as well as a synthesis of evidence on programs for juveniles. The study also included a nationwide survey of state correctional education directors to understand how correctional education is provided today and the recession's impact. The authors also compared the direct costs of correctional education with those of reincarceration to put the recidivism findings into a broader context.

Poverty declined significantly in the decade after Lyndon Johnson's 1964 declaration of "War on Poverty." Dramatically increased federal funding for education and training programs, social security benefits, other income support programs, and a growing economy reduced poverty and raised expectations that income poverty could be eliminated within a generation. Yet the official poverty rate has never fallen below its 1973 level and remains higher than the rates in many other advanced economies. In this book, editors Maria Cancian and Sheldon Danziger and leading poverty researchers assess why the War

on Poverty was not won and analyze the most promising strategies to reduce poverty in the twenty-first century economy. *Changing Poverty, Changing Policies* documents how economic, social, demographic, and public policy changes since the early 1970s have altered who is poor and where antipoverty initiatives have kept pace or fallen behind. Part I shows that little progress has been made in reducing poverty, except among the elderly, in the last three decades. The chapters examine how changing labor market opportunities for less-educated workers have increased their risk of poverty (Rebecca Blank), and how family structure changes (Maria Cancian and Deborah Reed) and immigration have affected poverty (Steven Raphael and Eugene Smolensky). Part II assesses the ways childhood poverty influences adult outcomes. Markus Jäntti finds that poor American children are more likely to be poor adults than are children in many other industrialized countries. Part III focuses on current antipoverty policies and possible alternatives. Jane Waldfogel demonstrates that policies in other countries—such as sick leave, subsidized child care, and schedule flexibility—help low-wage parents better balance work and family responsibilities. Part IV considers how rethinking and redefining poverty might take antipoverty policies in new directions. Mary Jo Bane assesses the politics of poverty since the 1996 welfare reform act. Robert Haveman argues that income-based poverty measures should be expanded, as they have been in Europe, to include social exclusion and multiple dimensions of material hardships. *Changing Poverty, Changing Policies* shows that thoughtful policy reforms can reduce poverty and promote opportunities for poor workers and their families. The authors' focus on pragmatic measures that have real possibilities of being implemented in the United States not only provides vital knowledge about what works but real hope for change.
