Part 2 of 2 Today we are releasing Version 2 of the CFPB Supervision and Examination Manual, the guide our examiners use in overseeing companies that provide consumer financial products and services. Our manual, originally released in October 2011, describes how the CFPB supervises and examines these providers and gives our examiners

direction on how to determine if companies are complying with consumer financial protection laws. We updated the supervision manual to reflect the renumbering of the consumer financial protection regulations for which the CFPB is responsible. The numbering conventions in the Code of Federal Regulations (CFR) allow the reader to easily identify which regulations fall under a particular agency's responsibility. The renumbering incorporated throughout the manual reflects the Dodd-Frank Act of 2010 transfer of rulemaking responsibility for many

consumer financial protection regulations from other Federal agencies to the CFPB. In December 2011, the CFPB published its renumbered regulations in the Federal Register. The renumbered regulations also included certain technical changes but no substantive changes. The CFPB's renumbering reflects the codification of its regulations in Title 12 (Banks and Banking), Chapter X (Bureau of Consumer Financial Protection) of the CFR. For example, before July 21, 2011, the Federal Reserve had rulemaking authority for the Home Mortgage Disclosure Act, which was codified in

Title 12, Chapter II (Federal Reserve System), Part 203. The CFPB's implementing regulation for the Home Mortgage Disclosure Act is now codified in Title 12, Chapter X, Part 1003. Your Money, Your Goals CreateSpace

In a 2009 study of the debt collection industry, the Commission concluded that the “ most significant change in the debt collection business in recent years has been the advent and growth of debt buying. ” “ Debt buying ” refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors,

including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a

greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008, with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also considered its prior enforcement and policy work related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than 5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt

buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:

The Army Lawyer

 The first fully-fledged example of a revenge tragedy, the genre that became so influential in later Elizabethan and Jacobean drama, *The Spanish Tragedy* (1589) occupies a very special place in the history of English Renaissance drama. Hieronimo, Knight-Marshal of Spain during its war with Portugal, fails to obtain justice when his son is murdered for courting Bel-Imperia, the Duke of Castile's daughter, and decides to take justice into his own hands... This new student edition has been freshly revised by Professor Andrew Gurr to incorporate the latest stage history and critical interpretations of the play. It also appends the scenes that were added in 1602, discusses Elizabethan attitudes to revenge, the Senecan features of the play and the significance of the Anglo-Spanish conflict in the 1580s.

 How mandated disclosure took over the regulatory landscape—and why it failed
 Perhaps no kind of regulation

is more common or less useful than mandated disclosure—requiring one party to a transaction to give the other information. It is the iTunes terms you assent to, the doctor's consent form you sign, the pile of papers you get with your mortgage. Reading the terms, the form, and the papers is supposed to equip you to choose your purchase, your treatment, and your loan well. More Than You Wanted to Know surveys the evidence and finds that mandated disclosure rarely works. But how could it? Who reads these disclosures? Who understands them? Who uses them to make better choices? Omri Ben-Shahar and Carl Schneider put the regulatory problem in human terms. Most people find disclosures complex, obscure, and dull. Most people make choices by stripping information away, not layering it on. Most people find they can safely ignore most disclosures and that they lack the literacy to analyze them anyway. And so many disclosures are mandated that nobody could heed them all. Nor can all this be changed by simpler forms in plainer English, since complex things cannot be made simple by better writing. Furthermore, disclosure is a lawmakers' panacea, so they keep issuing new mandates and expanding old ones, often instead of taking on the hard work of writing regulations with bite. Timely and provocative, More Than You Wanted to Know takes on the form of regulation we encounter daily and asks

why we must encounter it at all. Complying with the telemarketing sales rule DIANE Publishing For legal practitioners who are non-specialists in consumer protection law. A concise guide to the basic principles of consumer protection law. Credit Practices Bloomsbury Publishing Approx. 6.6% of credit cards (CC) were 30 or more days past due in the first qtr. of 2009 -- the highest rate in 18 years. To recover delinquent debt, CC issuers may use their own collection dept., outside collection agencies, collection law firms, or sell the debt. This report examined: (1) fed. and state consumer protections and enforcement respon. related to CC debt collection; (2) the practices involved in collecting and selling delinquent CC debt; and (3) issues that may exist related to some of these practices. To address these objectives, the author interviewed rep. from 6 large CC issuers, 6 third-party debt collection agencies, 6 debt buyers, two law firms, fed, and state agencies, and attorneys and organizations representing consumers and collectors. When a debt is seriously delinquent and the creditor sells the debt or refers the debt either to a collection agency or to an internal collection department, the collector or creditor can separately report the account to one or more of

the three largest nationwide consumer reporting agencies (NCRAs) as an account in collections. The presence of a collections tradeline can have a negative impact on a consumer's credit score. There are currently an estimated 220 million consumers with a credit report at one or more of the NCRAs. Collections tradelines affect the reports of nearly one out of three of these consumers. Consumers are far more likely to dispute the accuracy of these tradelines than of other information contained on their credit reports. Roughly half of all collections tradelines that appear on credit reports are reported by debt collectors seeking to collect on medical bills claimed to be owed to hospitals and other medical providers. These medical debt collections tradelines affect the credit reports of nearly one-fifth of all consumers in the credit reporting system. This paper describes characteristics of the medical and non-medical collections tradelines on consumers' credit reports and the processes by which they appear and disappear. It draws on analysis of data contained in the Consumer Financial Protection Bureau's (CFPB) Consumer Credit Panel (CCP);

consumer complaints to the CFPB about collections; and interviews with debt collection agencies, healthcare providers, and other observers of the healthcare billing and payment processes. The CFPB has not sought to verify original research introduced in this paper through its supervisory authorities. The paper does not draw upon supervisory information the CFPB has learned through examinations it has conducted, and does not make conclusions about whether any specific market participants are in compliance with particular statutes or rules pertaining to consumer reporting.

This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing

Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real-world situations, which will usually keep them well within legal bounds. Topics include:
