FE Exam Review for Structural Analysis Prof. V. Saouma Oct. 2013 Structural Analysis is part of the afternoon exam. In the afternoon, you are to answer 60 questions, and Structural Analysis is

about 10% of the test content (or about 6 questions). Each question is worth 2 points. You are expected to know: 1.

Fundamentals of Engineering (FE)

Practice Exam 1

The finite element method (FEM), or finite element analysis (FEA), is a computational technique used to obtain approximate solutions of boundary value problems in engineering. Boundary value problems are also called field

problems. The field is the domain of interest and most often represents a physical structure.

LISA is a free finite element analysis software package limited to 1300 nodes; the node limit can be removed for a low cost for individuals and businesses. Lisa can be used for static, thermal, vibration, dynamic response, fluid, buckling, dc current, electromagnetic and acoustic analysis.
